

NEWS of the CHURCHES

Church Services Are Announced For August 14

Many Interesting Programs Scheduled in La Grande Houses of Worship for Next Sunday.

Many interesting church programs are announced for the various houses of worship in La Grande for next Sunday, the second in the month of August.

Most of the churches and pastors have completed their vacation periods and will resume activities uninterrupted for the remainder of the year.

The programs follow:

Presbyterian Church (Washington and Sixth) — Not being away on vacation this month, the minister, Rev. J. George Walz, will speak Sunday morning, 11:00 o'clock, on "The Benevolent Works of God," a mid-summer sermon. Miss Edris Maguire will preside at the organ, playing the service. The quartet, Mrs. S. B. Morgan, soprano; Mrs. Lynn Bright, alto; Mrs. H. H. Hines, tenor; and C. E. Anderson, bass, will sing the anthem, and Mrs. Morgan will sing the offertory solo.

Dr. James H. Snowden, editor of the Presbyterian Banner, says, "The body needs rest, the mind needs instruction and the soul needs worship." On one day in seven, the fourth commandment stops the whirl of life and gives rest for recuperation, meditation and aspiration. Other days bind us to the seen and temporal, but the Sabbath links us with the unseen and eternal. Mr. Walz pointed out.

The Bible school meets at 9:45 a. m., and Christian Endeavorers meet at 6:30 p. m. A cordial invitation to all services.

Zion English Lutheran Church (M avenue near Fourth street) — "The Garden of God" will be the theme of the sermon preached by the pastor at the 11 o'clock service on Sunday morning. All are cordially invited to this service of worship.

In the Sunday school a story, "The Magic Spectacles," will be told. This is the first of a series of stories which are related to the picture "The Hope of the World." The session begins with worship at 9:45, and includes a study period for the classes. Parents are invited to send their children to this school.

The Luther League regrets to announce that Rev. Chester Webber, missionary from Africa, will not be able to speak to the league on Sunday evening, but will be in the city. There will be no meeting of the Luther League therefore. However, at a later date the young people will have the pleasure of hearing Mr. Webber tell of his work in Africa.

Central Church of Christ (Pennsylvania avenue)

The Bible school at the Church of Christ has established a new record for attendance during the month of July. This usually considered difficult month attracted an unusually large number of folks to Bible school with the record average of 170 per cent. The school is graded in every department, and an efficient corps of teachers and officers are in charge. At 9:45 Sunday morning, the school sends out a hearty greeting to all who will attend.

At 11 a. m. the usual morning worship service is conducted by the pastor, Rev. Paul De F. Mortimore. The observance of the communion is an important event in each Sunday morning service. The choir will present an anthem at this service. The pastor will preach, using the subject, "A New Idea." This will be the second of a series of sermons dealing with Christ's "Sermon on the Mount." The particular approach which Mr. Mortimore is using is the "practical" side of Christ's teachings.

Christian Endeavor meets at 6:45 p. m. with three societies assembling. Juniors under the supervision of Miss Dorothy Higgins. Juniors and children are invited. High school and young people's societies have interesting programs for their groups.

The popular evening service begins at 8 p. m. That this service has lost none of its popularity was shown last week when in spite of a hot evening, a splendid audience was present. The orchestra will begin the regular prelude-concert program Sunday evening, and the pastor will lead in singing old favorite hymns. The sermon will be "Where Do We Stand?" This is the second of a series of evening sermons which Mr. Mortimore has announced dealing with practical present day problems.

Baptist Church (Spring and Sixth)

The pastor of the Baptist church will preach a Junior sermon Sunday morning. Miss Marian Trill, age 5, will sing a solo, "Jesus Loves Me." This is family day and members of the same family are requested to sit together so far as possible. The subject of the evening sermon will be "Do Men Need a Savior?" Hours of services are: Bible school, J. Jordahl superintendent, 9:45; morning worship, 11:00; evening worship, 8:00; Tuesday morning prayer meeting, 10:00.

First Church of Christ, Scientist (Washington and First)

"Soul" will be the subject of the lesson-sermon in all Churches of Christ, Scientist, on Sunday, Aug. 14. Among the citations which comprise the lesson-sermon will be the following from the Bible: "The ransom of the Lord shall return, and come to Zion with songs and everlasting joy upon their heads; they shall obtain joy and gladness, and sorrow and sighing shall flee away" (Isa. 35:10).

The lesson-sermon also will include the following passages from the Christian Science textbook, "Science

Health

PRE-NATAL X-RAYING

The effects of X-ray upon the pre-natal development of the offspring of humans and animals has been studied extensively by many scientists.

In 1903 Bohn demonstrated that by X-raying the eggs of the sea urchin he was able to produce abnormal offspring.

In amphibians exposure to X-ray irradiation was found to result in the definite retardation of the development of the embryo.

The same kind of study was made upon birds and rats, both X-ray and radium being used.

In the experiments with the rats, it was found that prolonged exposure of the animal to either radium or X-ray resulted in injury to its unborn young, with the result that they were born dead, died shortly after birth or showed marked deformities of the brain and nervous system.

It was also observed that the earlier the irradiation by radium or employment of X-rays, the more destructive were the effects.

At times the results of such irradiation were not apparent at the birth of the offspring, but became evident subsequently in the stunted development of the young.

These studies have a definite bearing on humans in that, not infrequently, a woman who is to become a mother, may require treatment with X-ray or radium.

Experience has shown that the use of either of these agents in the region of the womb during pregnancy is fraught with great danger to the unborn child.

The danger does not exist when one or a few X-ray pictures are taken at this time, because in these instances exposure to the X-rays are of very short duration, too short to affect the development of the child in any way.

THE LOVE OF GOD

How feeble are both tongue and pen To tell God's wondrous love for men!

No language ever can express Such boundless love and tenderness: Its "breadth and length and depth and height" Are measureless and infinite.

We cannot comprehend the love Bestowed so richly from above: It "passes knowledge" of the mind. Its limits we can never find; But God is waiting to impart His riches to each seeking heart.

The Savior left His throne above To manifest His matchless love. To seek and save those who were lost And ransom them at any cost: He left the glory world on high, Upon the cross to bleed and die.

Alone in dark Gethsemane He prayed in bitter agony: In His own body on the tree He bore our sins to set us free, And there took our infirmities. And bore our sickness and disease.

Behold the Savior crucified! His life-blood flowing from his side, His nail-pierced hands and feet be- hold!

And mark His agony untold! What wondrous love for mortals lost To ransom them at such a cost!

O Lord, since Thou so lovest me, I'll not withhold my love from Thee!

My life to Thee I consecrate, My heart to Thee I dedicate: O God of Love, dwell in my heart, And never more from me depart!

Because of lack of an outstanding athlete, the University of Wisconsin basketball team will wait until the 1933 season starts to pick its captain.

C. E. Conference Will Be Held At Turner, Oregon

TURNER, Ore., Aug. 12 — Rev. Luther Stein, pastor of the Presbyterian church of Fresno, Cal., is to be the main speaker at the thirteenth annual Oregon Christian Endeavor summer conference, which begins on Monday evening, Aug. 22, and closes the following Sunday evening, August 28.

The program of conference has as its fundamental aim Christian Endeavor leadership training. The mornings are given over to classes on various lines. Afternoons are spent in various kinds of recreation. There are two lectures during the day, one in the morning, given by Dr. Walter L. Myers of Eugene, on the subject, "Jesus in the Modern World." The second lecture is in the evening and is to be given by Mr. Stein on the general theme, "The Adequate Christ." Mr. Stein also gives the Bible studies which is the first class in the morning. Each day closes with a bonfire meeting, at which Paul Brown, of Los Angeles, is the leader.

Other leaders in the conference include Ross Guiley, Eugene, field secretary, Oregon C. E. Union, and dean of the conference; Viola Ogden, Portland, state C. E. secretary; Hulda Anderson, La Grande, dean of girls; Eley Walker, Forest Grove, business manager; Wilma Eddy, Corvallis, assistant business manager; Mrs. Ross Guiley, Eugene; Vesta Orrick, Eugene; Helen McClay, Oregon City; Oleena Stephens, Eugene; and Edgar Hoover, Oregon C. E. president, Portland.

Petrifying Well

Near Knareborough, England, there is a "dripping well," full of lime-impregnated water, which completely petrifies, within a short time, almost everything that is suspended in it, such as dead canaries, flowers, baby shoes, etc.—*Collier's Magazine.*

Rhapsodizing

The word rhapsody is derived from the Greek and in antiquity was used to denote a heroic poem, such as a section of the "Iliad." In literature it is any high-flung composition. In music it is an irregular form similar to improvisation.

Season Live Chickens

In France live chickens are seasoned! Dr. A. Gauducheau makes use of a principle of physiology and injects sauces and seasonings directly into the blood stream. He calls it "intravascular." In this way the flavoring penetrates all of the meat.

Child Prodigy "Made Good"

John Stuart Mill may be taken as an example of a child prodigy who became a great thinker or writer. His father began to teach him Greek at the age of three, Latin at seven, and algebra, geometry and calculus at twelve. He began the study of logic at twelve and political economy at thirteen. He became a leading English social and political reformer, philosopher and economist.

Coal Designations

A piece of coal that carries hardly any carbon is termed a rock. A piece containing less than 40 per cent of carbon is classed as slate. A piece with from 40 to 60 per cent is classed as home and a piece containing over 65 per cent carbon is classed as coal. These are basic designations. Commercially pure coal, free from bone, slate and rock, will burn to a white ash that is of light weight and that is not bulky.

Sumpter Railroad Asks For \$200,000

WASHINGTON, Aug. 12 (AP) — The Sumpter Valley railway of Oregon asked the interstate commerce commission Friday for authority to borrow \$200,000 from the reconstruction corporation to pay interest charges and sinking fund requirements and to make repairs in rolling stock and right of way.

The Mt. Hood railroad, another Oregon line, applied for permission to borrow \$150,000 to pay taxes, purchase equipment and pay interest on its debts.
