

Rather Steady Tone In Butter Market Today

PORTLAND, Sept. 22 (AP) — Announcement was made by E. J. Dixon of the Pacific co-operative poultry producers of an advance of 1c each effective Friday in both medium and pullet eggs, which suggests general betterment in the trade structure. The new price on mediums will be 21c and pullets 14c dozen.

PORTLAND, Sept. 22 (AP) — There remains a rather steady tone generally for butter insofar as the undergrades were concerned but top scores were merely holding its own in the local trade. There was no change in prices for either prints or cubes during the day or during the latest session of the produce exchange.

Demand for undergrades was excellent, in fact offerings of these were being cleaned up quickly but there was a slower movement on top scores. Make of butter was showing little change for recent days but country offerings are gaining here because of the ability to obtain extreme prices for undercows, which were not available in competing centers.

There was no change in the price of butterfat.

Market for eggs is still inclined to show general steadiness with strength in spots. Receipts are moving out well within the price list established when the local co-ops advanced their quotations.

Although reports in the trade suggest that some of the leading killers are overtaken with light weight hens, there was no general change in the price list for poultry generally during the day.

According to a leading produce dealer, the chief reason for the lack of turkey demand is that the birds have no fat but are large and have the weight. This applies only to new crop. Old turkeys are still moving.

Once again dressed lamb prices are showing reduction along the wholesale way with considerable movement to this market. Sales are generally no higher than 8¢ 8½¢ lb.

There remains a very active demand for country killed calves with prices unchanged but hogs appear a trifle easier again with a general extreme of 6½¢ lb. for light blockers.

There is insufficient movement of cranberries in the Portland trade to establish values, which are held nominal.

Finally unchanged. Retailers generally show no interest in cranberries with other berries and fruits cheaper.

Demand for cling peaches continues to gain and some fairly good call is still suggested in Elbertas and J. H. Hale. Orange clings are in best call but Phillip variety is still showing many friends. Prices on these firm, on freestones steady.

Notes of wholesale trading: Onion market is very sluggish. Occasional carload sale of celery reported around 65¢ for half crates. Cauliflower demand is good for shipping but there is a shortage of 13 to create a liberal movement.

Wine grape market is a trifle slow with low prices held.

Concord grape movement is fair.

Apple demand is gaining with prices steady for ordinary jumble offerings. Strength for Jonathans at the source.
