

Much Talk, Few Facts Regarding Butter Shortage

PORTLAND, Oct. 26 (AP)—There appears more talk than facts in regard to the shortage of butter along the Pacific slope.

Despite the very heavy withdrawals of butter from stores along the Pacific slope there is still a very considerable volume of stock in sight.

There remains a rather firm tone in the market for eggs with practically no changes in the price list.

Price of spring chickens here is the lowest in the country and much the lowest along the coast.

There is some increase in the demand for dressed turkeys.

Further out in the price on country killed calves is shown locally for today.

While trade is not showing any excessive snap, a steady tone is suggested in wine or juice grapes.

Notes of wholesale trading: Florida grapefruit is selling well with additional receipts.

Some very fancy lettuce arriving from The Dalles and priced up to 90¢ crate.

A sudden jump in demand for pumpkins. No change in the price.

Carload demand for cauliflower is gaining with cash sales around 30¢ 40¢ crate.

PORTLAND CASH: PORTLAND, Ore., Oct. 26 (AP)—Cash wheat: Big Bend bluestem 52c.

PORTLAND PRODUCE: PORTLAND, Oct. 26 (AP)—Country meat—Selling price to retailers: veal—cra 80-100 lbs. 7¢ 7½¢ lb.

Butter, butterfat, eggs and live poultry unchanged.

Here And There In Politics

There is so much straddling this year on prohibition that neither the Anti-Saloon league nor the Association Against the Prohibition Amendment, which have been canvassing sentiment among candidates for congress, has been able to compile any thing like a complete list of who's wet and who's dry.

Whatever it may mean as to New Jersey's electoral vote, Frank Hague is prominently reported to have been the principal intermediary during the peace negotiations between Franklin D. Roosevelt and Alfred E. Smith.

With Gene Tunney, Tad Jones and Abbie Booth mixed up in the Connecticut political scrimmage, the state might be suspected of over-emphasis on athletics were it not for the classical presence also of Professors Hiram Bingham, Wilbur Cross, et al.

Washington observers who recall President Wilson's determination to resign at once if he was defeated for reelection in 1916 are speculating whether any similar plan will pass through the mind of President Hoover in case the 1932 election goes against him; but no one pretends to have any information.

U. S. Steel preferred, following declaration yesterday of the regular \$1.75 a share quarterly dividend, soared \$4.12 share to \$76. U. S. Steel common gained 62 cents to \$35.25.

Closing figures of 14 of the leading stocks follow: Al. Chem. & Dye 72½; American T. & T. 109½; Bethlehem Steel 17½.

PORTLAND LIVESTOCK: PORTLAND, Ore., Oct. 26 (AP)—Cattle 200; calves 10; steady. Steers 600 to 900 pounds medium \$4.75 @ \$5.75, common \$3.00 @ \$4.75.

WITH THE DOPESTERS: Add election forecasts: The official publication of one of the women's prohibition organizations recently predicted that the Prohibition party ticket, headed by William D. Uphaus, would carry New York state.

Proof that this is the open season for independent and minor party candidates is provided by the ballots of New York state, which carry the names of 143 persons entered for 45 seats in congress.

When Mrs. Theodore Chatlos, of Erdensheim, Pa. (top photo), and her mother, Mrs. Charles K. Radcliffe, of Plymouth Meeting, Pa. (lower photo), were blessed with girl babies within a week's time at Chestnut Hill hospital in Philadelphia, bias attentions scratched their heads.

Finding Of 'Jekyll-Hyde' Germ Hints Same Microbe May Be Cause Of Different Diseases

WASHINGTON (AP)—A "Dr. Jekyll and Mr. Hyde" germ that can change into three different "disguises" has been found by the public health service.

The germ may appear as a streptococcus, or chain of cells such as causes pneumonia; a rod-like, sausage-shaped object like the diphtheria bacillus, or it may be a filterable virus like that which causes infantile paralysis, in which case it is invisible.

The form that it takes depends on conditions under which it is grown, the kind of nourishment available, and other unknown influences—Dr. Alice C. Evans, research worker of the public health service's National Institute of Health, found.

The discovery suggests, said a statement from the service, that the development of disease is influenced not only by germs, but by the kind of environment in which the germs develop. It raises the question in the belief of some scientists, whether the same germ may cause two different diseases, or two different forms of the same disease, depending on the part of the body in which it develops.

Dr. Evans' experiments confirm work of other scientists who already had discovered that germs apparently have the power to change from one form to another.

She worked with a streptococcus, or chain-like germ taken from the brain of a man who died of encephalitis, a form of sleeping sickness. It was not known whether the germ was the cause of the disease. When grown on different kinds of media, or germ food, the streptococcus changed from its chain shape to the sausage shape, and then to the form of a filterable virus.

The next step will be to determine whether the different forms of the germ cause different diseases or perhaps different forms of the same disease. If that is the case, the whole science of bacteriology, which deals with germs, may have to be revised.

Although getting little else out of its business, the grain trade would feel better if it could get the government out.

The Garden

MAY TULIPS FINEST OF SPECIES: May-flowering tulips are the finest of their race. They are taller, larger, and more varied in color than the earlier classes. The varieties most suited to garden use are commonly classified as Darwin, Cottage, Breeder, Bibbemen, Bizarre, Rembrandt and Parrot.

The basis of classification is blood relationship and family resemblance. There is no reason why varieties of all these different classes should not be grown in the same bed, provided colors are chosen which will look well together; and it is hard to find a color clash among the May-flowering tulips.

All of these garden classes are hybrids; that is, they have been developed from native species. Most of the native species are May-flowering. Many are still grown in rock gardens, and for naturalized effects. As a rule they are smaller and less hardy than those of a much less interesting color range than the hybrids which represent several centuries of plant-breeding for improvement.

Being one of the oldest of garden flowers with a recorded history, the tulips have an interesting background. The oldest of the garden types are the Breeders. No one knows from what native species they came. But they were grown by the Dutch breeders of the sixteenth century for the purpose of producing, by the process known as "breaking," the gayly-striped varieties now called by bloemen and bizarres. These striped varieties were highly valued and speculating in them caused the financial crisis known as the tulipomania.

The Breeder tulips were never as highly valued for their own merits as they are now, when modern taste considers their rich but somewhat dull colors, in which tones of brown are usually present, most desirable in the garden.

Darwin tulips were an introduction late in the last century, supposed to be hybrids of Breeder tulips, but the origin was kept secret by the introducers. They are characterized by soft pastel colors, always with a white overblow, including a remarkably complete color range.

Cottage tulips are brighter in color, not so tall, and not so large as the Darwin and Breeders. They are usually later, and they have brilliant yellows. The flowers as a rule have pointed petals, which often are inclined to reflex, or turn back.

EGYPTIAN ASKS NATIONS TO EJECT BRITISH ARMY: CAIRO (AP)—A native of Cheol-el-Kom, Lower Egypt, appointed himself commander-in-chief of a mythical army to "liberate the country from the British." To assist his campaign he wrote to President von Hindenburg, telling him to send 30 German submarines up the Nile; Mustapha Kemal, directing him to dispatch 70,000 Turkish troops; The League of Nations, demanding evacuation of the British soldiers. The "war lord" wound up in jail.

For the first time in our history we offer brand new furs—brand new styles—priced for so very, very little! Grosgrain bands; genuine leather sweatbands!'.

Large advertisement for Chesterfield cigarettes. Features a woman and a man, a pack of cigarettes, and the slogan 'What on earth are you up to now?'. Text includes: 'FINDING things out, smarty! I thought I'd examine the tobacco in a cigarette. Look here... this is Chesterfield tobacco. Notice its lighter color... you don't see any dark heavy types, do you? I guess that's why Chesterfields are milder. I'm told that uniformly lighter color is due to cross-blending. It sort of welds all the tobaccos into one. And here's something else. Notice that these long shreds are all cut the same width. It stands to reason they burn smoother and cooler. I don't pretend to be an expert but it looks to me as if they make Chesterfields right. Here, light one. That's the best test after all. They Satisfy.' The Cigarette that's MILDER and TASTES BETTER. CHESTERFIELD CIGARETTES. LUGGATT & MYERS TOBACCO CO.

Advertisement for New York Store featuring 'Here's Our Line-up of KNIT DRESSES and Two-Piece SUITS'. Prices listed: \$2.95, \$4.95, \$6.95.
