SUMMERTIME BRINGS PICNICS—The Fourth of July means a picnic in most family circles, and what to serve is of prime importance to the housewife. To most of us, a picnic means filling the picnic basket with the bulging point with fried chicken, potato salad, devil's food cake, ice cream and perhaps watermelon. Of course other things will be included too, but these are the foods most of us look for.

If fried chicken has to be checked from the picnic menu this year, try serving kabob. Kabob is the Persian name for meats skewered on a sharp stick and cooked over an open fire. Allow about a quarter of a pound of meat for each person, cutting it into small pieces, about two inches in diameter. Cook over the coals, turning occasionally so that it will cook evenly. When the meat is done to suit you, apply plenty of butter, salt and pepper.

You can make kabob of all sorts of meat—pork chops, mutton, lamb, liver and bacon. They can even be made from cheese. These are called cheese in blankets. Cut American cheese into two inch cubes, cover all sides with bacon, fasten securely with toothpicks and place on the stick. Cook over the fire until the bacon is done to suit you. Place between buttered slices of a roll and eat at once. Cheese in blankets can also be made at home in the oven and are delicious for luncheon or late supper.

Along with the fried chicken, the kabob or the cheese in blankets, well buttered sandwiches or rolls are a good accompaniment. Radishes, onions, sliced fresh tomatoes, crisp carrot sticks or shredded cabbage are easily prepared and are the types of vegetables to include in the picnic basket. If members of the family insist on potatoes, peel a chip or new potatoes fried in butter along side the kabob will be a welcome addition.

Stripes Essential to Smart Sports Attire

BY CLAUDETTE

One must wear stripes if you are to be smart in sports wear this season and, simplicity being the ultra vogue, any unusual lines are achieved by the use of stripes.

Numerous have been the diagonal stripe models, so the simple frock in the accompanying sketch is a decided innovation.

If you want something comfortable, yet with a definitely tailored air, this is it.

In contrast, white accentuates the collars and cuffs, belt and pockets. Light buttons to match the stripes are the sole trimmings.

If the frock is fashioned from cotton or silk material, four yards are required, with one-fourth yard for trimming. In woolen material, three and one-quarter yards will make the dress. Patterns can be obtained in standard sizes from 14 to 32.

To obtain a pattern, with instructions for making, send 20 cents, coin if possible, to Claudette, 100 North Broadway, Los Angeles, Cal. Don't fail to state your size.

AT THE LIBERTY

ROBERT MONTGOMERY and SALLY EILERS "MADE ON BROADWAY"

Described as a glittering panorama of New York life from Battery Park to Harlem, "Made on Broadway" comes to the Liberty theatre starting Thursday with Robert Montgomery and Sally Eilers, two of the screen's most popular younger players, costarred for the first time.

Montgomery is said to have another high-speed comedy role as Jeff Bidwell, super-tixer, "wise guy" and debonair gambler who hoodwinks society and reaps a harvest on Broadway. Miss Eilers undergoes an interesting character development as the bedraggled cafe waitress who is rescued from a watery grave by Montgomery and who subsequently becomes one of Manhattan's most pampered playgirls.

The unusually strong cast also features Madge Evans as the ex-wife who tries to help Montgomery decide a course of action during his mad career as a high-pressure public relations expert, and the supporting players include the comic Eugene Pallette, O. Henry Gordon, Jean Parker, Ivan Linow, David Newell, Vince Baggett and Joseph Cawthorn.

STEEL ALONE IS NOT ENOUGH!

—neither strong enough, nor safe enough, nor quiet enough for the body of a quality car like CHEVROLET

Why is it that every 12-cylinder and 16-cylinder car in America has bodies of steel reinforced by hardwood? Why is it that every make of car selling for over \$4000 uses bodies of exactly the same type? Why? For the same reason that Chevrolet uses it exclusively. Because every test and every experiment have definitely proved: STEEL ALONE IS NOT ENOUGH!
