Favors Electric Chair as Penalty For Kidnapings

By Charles E. Honce NEW YORK (AP) — It will "be a very fortunate and comfortable day for the people of this country when some kidnaper sits down in the electric chair," in the opinion of Ed-

mund Pearson, America's foremost writer on real life crimes. "The crime of kidnaping is one which cannot be explained by people who try to account for all crime on the ground that it is a matter of sudden passion or impulse," said Pearson.

"It is a piece of carefully thought-out and calculated devilishness. The kidnaper plans to extort money by torturing people. The men who plan kidnapings ought never to be allowed outside of prison again."

Pearson believes swift and sure punishment, particularly of murders, offers a solution of the crime problem, citing the example of England and Canada. Ten years of murder trial study also has convinced the historian of the Little Borden murder case and other sensational American crimes that 80 or 90 per cent of persons formally accused of murder are guilty.
