

# "We Do Our Part"

*Thus in four words the President of the United States has voiced the slogan of America's National Recovery program... As one city among hundreds whose co-operation the program requires, La Grande Merchants, business houses, manufacturers and professional men welcome the opportunity to "Do Our Part" toward national recovery. To observe not only the letter of the recovery laws, but their spirit as well.*

*Firm support of a conviction is expressive of this city. Without a loyal belief in the high standards for American living, we could not have so steadily maintained high standards for our merchandise and service. Now, in future support of this belief, we pledge aid to the President of the United States in his Recovery program and his drive for increased earning power and increased employment throughout the land, and today a copy of this advertisement is being forwarded to the President.*
