Lengthening Skirts Call for Hem Plaits

BY CLAUDETTE

Chivalrous plaits they might well be termed, as they come to the aid of Milady in fashion distress, and stylists as well. You must know, of course, that skirts are gradually descending, almost to ankle length, and the prevailing silhouette mode, with smooth, satiny-finished materials in high favor, must have relief.

Women, style or no style, simply will not tolerate those tricky and bothersome "hobble" skirts as they once did, and so plaits are being employed at the hem line to assure walking freedom. They also lend a trim appearance to the otherwise molded tulle.

The gracefully draped flared collar is something decidedly new and flattering in the treatment of necklines. This tailored frock requires 4 1/2 yards of material with one yard for the collar. Patterns can be obtained in standard sizes from 14 to 42.

To obtain a pattern of this garment, with instructions for making, send 20 cents, coin if possible, to Claudette, 100 North Broadway, Los Angeles, Cal. Don't forget to state your size.

J. Eaton and Mr. and Mrs. Ollie Entertine, all of La Grande.
