NIGHT SHOWER IS FIRST IN 26 DAYS HERE

The first rain in 26 days in La Grande occurred last night when precipitation of .02 of an inch was recorded — little more than a brief shower, and not enough to benefit parched lawns and vegetation.

The sky was partly cloudy this morning with indications the stormy weather was ended. Tuesday's maximum was 84 above.

THIS CURIOUS WORLD

THE VISIBLE PORTION OF THE MOON HAS BEEN MORE THOROUGHLY EXPLORED BY MAN THAN MANY PORTIONS OF THE EARTH!

ABOUT 30,000 CHIMNEY SWIFTS HAVE BEEN TAGGED IN AN EFFORT TO FIND OUT WHERE THEY SPEND THEIR WINTERS!

THE HAMADRYAD, A LARGE SNAKE OF THE COBRA FAMILY, EATS NOTHING BUT OTHER SNAKES!

ANY OBJECT on the side of the moon next to us can be seen with a powerful telescope, provided that the object is 100 feet or more in diameter. This leaves many smaller details to be guessed at, but there are hundreds of thousands of square miles of the earth's surface that have never been seen by human eyes.
