## TOURING WITHOUT A MAP

The man who wants to get a good idea of the way the whole administration recovery program is going to work out can't do much else than come back about two years from now.

The one thing that is clear today is that all signs fall in a time like the present. We're trying something so completely new that the man who wants to do a little prognosticating has nothing to go on. Everything is adrift, and about the only prediction that seems safe is that when the various blocks have all been put together again the picture will look like nothing we ever saw before.

It is for this reason that all the learned attempts to analyze and dissect the recovery program are so contradictory. No two critics of the program get the same result.

Does the arch-conservative complain — as one did, recently — that it is getting almost impossible to tell the news from Moscow from the news from Washington these days? On another page you can find the arch-radical protesting that the whole business is just a great fascist coup designed to enthrone privileged wealth forever.

Does the studious economist prove conclusively, with graphs and columns of figures, that the kind of economy represented in the industrial and agricultural control plans cannot possibly work? You can find books by equally studious economists (written before March 4 last) proving that only through a planned economy similar to the one now being attempted can a merchandized modern society survive.

The doctors, in other words, disagree about as thoroughly as can be imagined; and the more thoughtful and learned they are, the more they seem to differ with one another. And what it all comes down to is the fact that we are starting out on a road so new that we have got to make up our maps as we go along.

That, in turn, brings our democratic society up against its supreme test. Have we enough intelligence, enough aptitude for the science of politics, enough training in the business of self-government, to carry this experiment through successfully? If you doubt it you had better start looking for a cyclone cellar. But if you believe that we have — and there are good reasons for so believing — you can face the future with confidence.

## ATTENDANCE AT LOCAL CHURCH SHOWING GAIN

A ten Sunday's campaign which started yesterday at the Central Church of Christ found enthusiasm very high and accomplishment in excess of expectations. This campaign has for its goal the doubling of the Bible school attendance, increasing attendance at all worship services, and leading souls to Christ. The Bible school attendance was 271, the best this year.

Services were attended by large audiences, the evening audience rivaling in size attendance for much advertised evangelistic services. Rev. Paul De F. Mortimore preached on the subject, "The Most Horrible Sin in The World." Avery Millinger, L. H. S. freshman, won the Bible offered to the first to correctly answer "what is the most horrible sin." Hundreds guessed but only three correctly.

## Beware the Cough or Cold That Hangs On

Persistent coughs and colds lead to serious trouble. You can stop them now with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a new medical discovery with tow-fold action; it soothes and heals the inflamed membranes and inhibits germ growth. Of all known drugs, creosote is recognized by high medical authorities as one of the greatest healing agencies for persistent coughs and colds and other forms of throat troubles. Creomulsion contains, in addition to creosote, other healing elements which soothe and heal the inflamed membranes and stop the irritation and inflammation, while the creosote goes on to the stomach, is absorbed into the blood, and attacks the seat of the trouble.

Creomulsion is guaranteed satisfactory in the treatment of persistent coughs and colds, bronchial asthma, bronchitis, and is excellent for building up the system after colds or flu. Your own druggist is authorized to refund your money on the spot if your cough or cold is not relieved by Creomulsion. —Adv.
