

ACREAGE AND PRODUCTION STATEMENTS

Wheat production and acreage statements of members of the Wheat Production Control Association of Union County, state of Oregon.

The following is a statement of the production and planned acreage of wheat in the years 1930, 1931, 1932 and planned acreage for 1933 of members of Union County who have submitted applications for farm wheat allotments. This publication is made in compliance with the regulations of the Agricultural Adjustment Administration. It is made so that a check may be made on all statements...

The allotment for this county has been definitely calculated from official records of the U. S. Department of Agriculture, and is 1,364,125 bushels. This is the total allotment for the county. Therefore, if any farmer receives a greater allotment than his past production warrants, he is thus depriving other farmers in this county of their fair share.

Total production figures of those who apply for contracts, together with those who do not, must equal the official production as shown by the records of the U. S. Department of Agriculture. If the official totals are greater than the county totals, it will be necessary to make a downward adjustment.

Any person may make a confidential report if he finds any statements here which he believes to be inaccurate. Such reports should be made to the community or county committee, either in writing or verbally, within five days of publication hereof. The report will be carefully considered and if necessary, the statements are to be inaccurate will need to prove his production figures.

Farmers have been asked to furnish evidence of production and evidence of sale, such as three-month certificates, elevator certificates, or other records and receipts. Satisfactory evidence of production and any other evidence required of any farmer whose statement is questioned.

The following statements have been condensed to save space. "Acre" represents acres planted and "bushels" represents bushels harvested. The "four-year average" represents the four-year average production of 1929-1932. Farmers should refer any questions regarding this publication to their community committee or to the County Allotment Committee.

Signed: ERNEST H. DE LONG, Chairman County Allotment Committee.

M. T. WALLINGER, MERRILL COWLEY.
