FINDING ART FOR THE CRITICS

One of the pleasantest things about the people of the United States is the fact that in a time like the present, when history is being made by wholesale and signs and portents are crossing the sky so fast that they tread on one another's heels, they can devote themselves wholeheartedly to a lulling little song about a big bad wolf.

The song itself is of the simplest. It points no moral, and, if it adorns a tale, the tale is nothing but a moving picture version of an old nursery fable.

That sort of thing happens every so often. Ring Lardner was acclaimed by the highbrows as a genius when he died.

It was the same with Charlie Chaplin. He had sent millions of ordinary folk into convulsions of laughter for years before the graybeards began to write soulfully about his "great art" and his "cosmic significance."

So it was, too, with newspaper comic strips. Several years ago a critic wrote a book to point out that the comic strips were not only funny, but offered a valuable sidelight on American life and constituted a true expression of the American spirit.

Presently, then, we shall be hearing fine things about three little pigs and the big bad wolf. Meanwhile — well, why do the critics lag behind the public in their appreciation of what really is good?
