

NEW NAVAL AND MILITARY POLICY IS BEING FORMED

By Byron Price
(Chief of Bureau, The Associated Press, Washington)

A new military and naval policy, based on greater strength at sea and army realignment to eliminate top-heaviness, is emerging from discussions now in progress in Washington.

There is little doubt in official circles that President Roosevelt will back up wholeheartedly as a major tenet of his appropriations program. Secretary Swanson's request that congress build up toward naval treaty limits.

A former assistant secretary of the navy, Mr. Roosevelt has an abiding conviction the nation's first line of defense must be kept strong under present world conditions. He has been told his overture of last May to the powers to join in mutual arms reductions is not likely to have real results.

It is not so generally accepted that Gen. MacArthur's plea for a larger army will be pressed by the White House.

Some high in the administration feel that while the rank and file might well be strengthened, a great saving in that direction could be made by simplifying and reducing the general staff set-up in the war department.

There was a special reason why the president came under such strong pressure to clarify his money policy immediately on his return to Washington from Warm Springs.

In his absence, Acting Secretary Morgenthau's "Don't-talk" order to treasury officials had been followed by the circulation of many strange reports regarding administration plans.

One story was that the whole policy was to be reversed, and the currency returned to the gold basis as it existed under Hoover. Actually, nothing was further from the expectations of those on intimate terms with the White House.

Another report was that the president intended to go to the other extreme, and begin issuing "green-back" currency with no backing. He

repeatedly had told his friends he would not do so.

The truth is the administration is trying to change the basis of the currency, and the question is "What sort of basis should be adopted?" Some want a modified gold basis, some silver and gold, some a selected group of commodities, some all commodities.

The best bet seems to be some form of "commodity dollars."

Recent signs of restlessness in the "brain trust" came as no surprise to the practical politicians.

Professors are noted for having their own ideas, usually different from those of other professors, and for sticking to their theses to the bitter end. Politicians are used to strange bedfellows, but they knew all along that economists were not—and have been counting on it.

Efforts are continuing to bring President Roosevelt and Henry Ford together for a talk which many believe might wipe out all difficulties between Ford and NRA. The present trouble is that neither side seems willing to make the overture in a form acceptable to the other.

In formulating his national defense policy, the president will insist on closer coordination between army and navy, to insure better union in case of war.

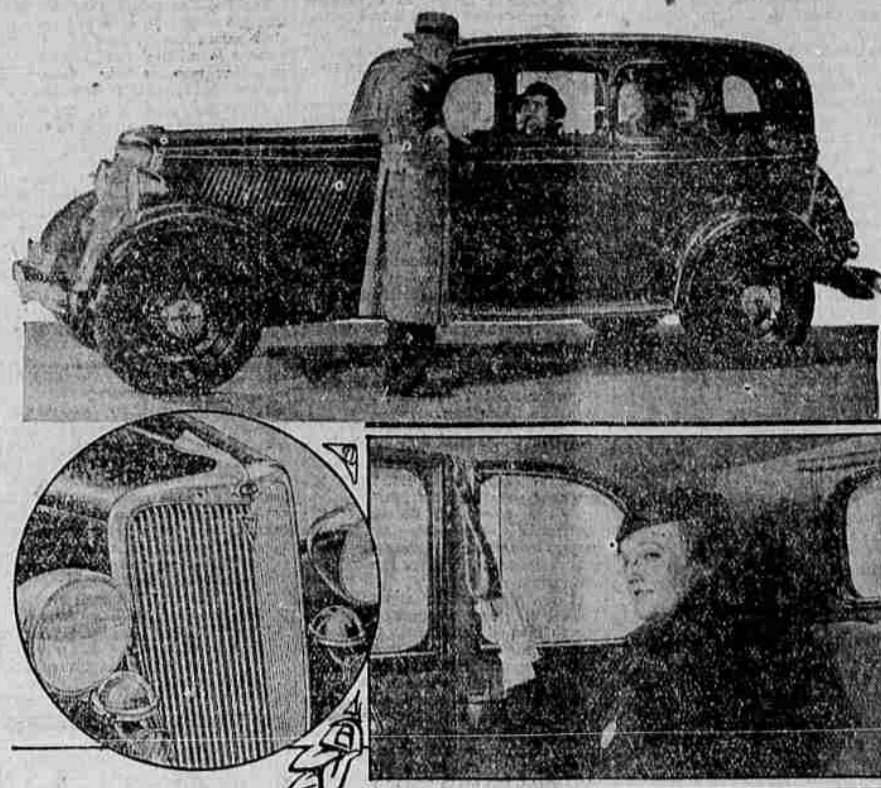

Running in Salt Fields Develops Marathon Marvel

TOKYO (AP) — Kipling's Yellow Dog Dingo, which ran through the salt fields of Australia until his hind legs ached, and Japan's premier marathon runner, Kozo Kusunoki, attained their prowess in very similar surroundings.

Kusunoki, who recently won the long grind in the national Meiji Shrine stadium games here, battering Juan Carlos Zabala's Olympic record of 2 hours, 31 minutes, 38 seconds by 26 seconds, hails from the southern island of Shikoku, where the largest salt fields of Japan lie.

As a small boy Kusunoki used to run with his playmates around the salt fields, and recently when he reached manhood he got a job as overseer of the big deposits. It became his duty to cover a wide area daily to see how the salt water was drying. Running over this heat developed wind and stamina.

New Ford V-8 Model Shows Smarter Lines Colored Fenders and New Ventilating System

Refinements in the design of the radiator and hood and more luxurious interior appointments feature the appearance of the new Ford V-8 for 1934. Colored fenders are standard on all de luxe cars. Dual down-draft carburetion and dual intake manifold give greater power and speed to the engine, increasing flexibility and smoothness. Gasoline and oil economy is also increased. A clear vision ventilating system prevents drafts and provides the desired amount of fresh air in any weather. Ventilation may be controlled by passengers individually. The easy riding qualities of the Ford V-8 have been increased by the use of more flexible springs, improved shock absorbers and softer seat cushions. Illustrated are: (top) the de luxe Tudor sedan; below (right), rear compartment of the de luxe Fordor sedan showing the ventilating slot and (left), the attractive front end.

Theatre Stars Glitter In The New Mode

By Rita Ferris
(Associated Press Fashion Editor)

PARIS (AP) — The styles that the stars of the theatrical world have chosen from world-famous shops here are designed to accent their personalities.

Colorful little feather capes which act as a frame for famous features are worn with their trailing evening gowns, touches of silver and gold

lame lighten late afternoon clothes and even their sports tops are chosen to enhance the color of their eyes and hair.

Gertrude Lawrence, English actress, wears a Molyneux gown of emerald green moire designed to mold her slender figure with a little waist-length cape of coque feathers shading from young leaf green to emerald.

Dora Duby, American dancer, who spends much of her time abroad, likes a touch of glitter on her afternoon clothes. She wears two Worth frocks — one of silver lame cut on the simplest lines, the other of soft gray wool embroidered in gold dots and finished at the neck and wrists

with touches of white satin embroidered in gold threads.

Sparkling rhinestones give a brilliant touch to a brown satin afternoon ensemble which is worn by Betty Hamilton, another American dancer who has been appearing here. The buttons fasten a high necked frock hemmed in oter and a hip-length jacket cuffed in the same fur.

Ima Claire and Lily Damita, two well known actresses, have both chosen gray for their sports clothes.

A 38-pound mudhook anchor and 14 feet of chain were stolen from the yacht of E. E. Jones when he left it for a short time at a dock in Seattle, Wash.

Simply "scrumptious."

PEPPERMINT CANDY ICE CREAM
1 cup hard peppermint candies
1 cup milk
1 pint whipping cream.

Crush candy by pounding in cloth, then dissolve in the milk in top of double boiler, stirring frequently. Chill. Pour into tray of mechanical refrigerator. Let mixture freeze to mush, fold in the cream that has been whipped and finish freezing. Serve with chocolate creams, that have been melted in top of double boiler, as a sauce. Serves 8.

For aid in household problems, menu planning or special recipes, send in your request with a self-addressed, stamped envelope to Julia Lee Wright, director, Homemakers' Bureau, Safeway Stores, Inc., Box 660, Oakland, California.

MRS. HEN: "DEARIE, WILL YOU TELL ME WHY WE DON'T GET ANY CAKE ANY MORE? SHE USED TO THROW SOME OUT REAL OFTEN!"

MR. ROOSTER: "MY LOVE, DON'T YOU SEE THAT CAN OF CALUMET BAKING POWDER ON THE SHELF AND THAT CALUMET RECIPE BOOK? SHE DOESN'T HAVE TO THROW AWAY ANY CAKE NOW!"

Always depend upon Calumet Baking Powder to give successful results. The remarkable texture will be a revelation to you.

The "velvety crumb" of Calumet cakes—the delicate fluffiness of Calumet biscuits and muffins—are the result of perfectly controlled Double-Action.

The first action takes place in the mixing bowl, so well-balanced and sure, that make in the heat of the oven. It is the two actions, so well-balanced and sure, that make all Calumet baking rise to such beautiful, even lightness.

Notice the thrifty small proportion called for in Calumet recipes—usually only one level teaspoon to a cup of sifted flour, much less than with many baking powders. Thanks to Calumet's efficient Double-Action—a little goes a long way!

Ribbon Cake—(3 eggs)

3 cups sifted Swans Down Cake Flour	1/4 teaspoon cinnamon
3 teaspoons Calumet Baking Powder	1/4 teaspoon cloves
3/4 cup butter or other shortening	1/2 teaspoon mace
1 1/2 cups sugar	1/2 teaspoon nutmeg
3 egg yolks, well beaten	1 1/2 tablespoons molasses
1 cup milk	1/2 cup raisins, finely cut
3 egg whites, stiffly beaten	1/2 cup figs, finely cut

Sift flour once, measure, add baking powder, and sift together three times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add egg yolks and beat well. Add flour, alternately with milk, a small amount at a time. Beat after each addition until smooth. Fold in egg whites. Fill two greased 9-inch layer pans with two-thirds of mixture. To remaining mixture, add spices, molasses, and fruit, and pour into one greased 9-inch layer pan. Bake layers in moderate oven (375° F.) 25 minutes. Arrange spice layer between light layers. Spread red currant jelly between layers and boiled frosting on top and sides of cake. (All measurements are level.)

Another woman cheers for Calumet
