More Funds May Make New Road Possible For Cove

Cove (Special)—If further C. W. A. funds are available in the future a plan will be entered for a road above Cove which will facilitate road hauling for families living east and north of Cove. A large percentage of all wood used here comes from the two forks of Mill creek, as most of the wood on the west slope of Mt. Fanny is privately owned. Many people living north and east of Cove must haul their wood down hill to Cove and then back up the hill from Cove to their homes. This would be unnecessary if the proposed road could be built. The road as planned would connect the Mill creek canyon road and the lane which passes the property owned by Frank Munk about one mile north of the canyon road. The proposed road would leave the canyon road at the Munk bridge and follow the hill to the north through the Munkham property in an S curve which would eliminate all steep grades in either direction, making a road with no more than a five per cent grade at any point. It is estimated that between 30 and 40 families would be benefited by this road.

If the proposed road is built it would be possible to extend the rural mail delivery route out of Cove to cover the Mill creek canyon territory which cannot otherwise receive this service as there is no way to make a loop and the entire distance would have to be retraced as it now stands. There are between 15 and 20 families all the canyon road who are a mile or more from postal facilities and as many more on the road who are within the mile limit. The government will not extend such a route unless there are sufficient persons who live more than a mile from a post-office or rural route. If the proposed road is established, however, the present route could be extended to cover this territory.

C. W. Clark is collecting data to be presented in behalf of the proposed road as soon as there is any assurance that funds for C. W. A. work will be available.

HI-WAYS TO HEALTH

by ADA R. MAYNE

OREGON DAIRY COUNCIL

Whether it be a party or just a surprise for the family on Valentine's day, the occasion calls for something special to be served, especially in the way of a dessert. What could be more appropriate than the serving of ice cream in some form? Everyone enjoys ice cream and there are many attractive ways to serve it. The possibilities for ice cream desserts are as many as the variety of sauces that can be made.

What a pleasant coincidence too, that ice cream, as well as being a favorite dessert with everyone, is also a most nutritious food. Composed principally of milk constituents, ice cream is really milk in a most delicious form. This means that ice cream is a good source of the muscle building material, protein, and especially of the bone and tooth building minerals, calcium and phosphorus. Because of the high value in ice cream, it should have a prominent place in well-balanced meal planning. Ice cream is an economical food, too, since it contributes so much to the diet and is always readily available, convenient and easy to serve.

Along with ice cream, if served plain, a hot chocolate cake will be in keeping for the Valentine surprise. It is made as follows:

Hot Chocolate Cake
 1/2 pound chocolate
 1 cup brown sugar
 1/2 cup milk
 1 egg yolk, well beaten

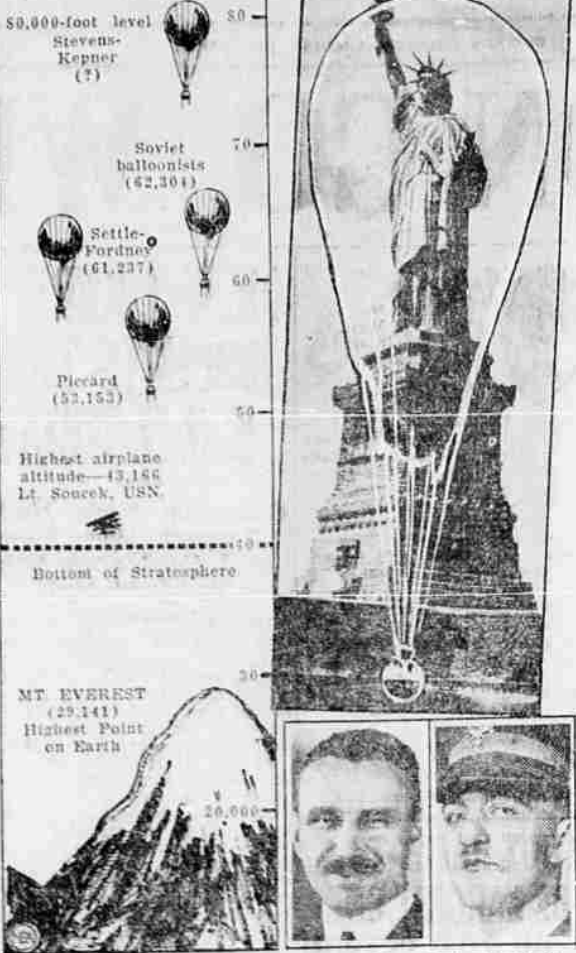

1 tsp. baking soda.
 1/2 cup butter.
 1 cup sugar.
 3 eggs.
 3 cups cake flour.
 1/2 tsp. salt.
 1 1/2 tsp. baking powder.
 1/2 tsp. cinnamon.
 1 cup thick sour milk.
 1 tsp. vanilla.

Melt the chocolate in a double boiler. Add the brown sugar, milk and egg yolk and cook until thick. Cream the butter, add sugar, then the eggs and beat well. Sift flour, cinnamon, add salt, baking powder and cinnamon. Beat. Add to sugar-butter mixture alternately with the sour milk. Stir in vanilla. Add soda to hot chocolate mixture and add to the cake batter. Pour into well buttered layer tin. Bake in a slow moderate oven (325 degrees) about an hour. Frost with a boiled icing. May be sprinkled with tiny chocolate hearts.

For a delicious sauce for the ice cream sundae:
 1 pint maple syrup.
 1/2 cup cream.
 3 tbsp. butter.
 1-3 cup chopped figs.
 1-3 cup chopped dates.
 1-3 cup chopped pecans.

Put maple syrup, cream, and butter into a sauce pan and boil to 230 F. Remove from fire, cool and add chopped fruit and nuts. Serve over vanilla ice cream.

Plan 15-Mile Rise in Giant Balloon

The U. S. Army's aerological photographer, Capt. Albert W. Stevens, and his Greek balloonist, Maj. William Kepner, are planning to rise 15 miles in a balloon that will have five times the capacity of the one used by Lieut. Com. Settle in his record altitude flight last fall. Their balloon will hold 2,000,000 cubic feet of gas when fully inflated, and will be 295 feet high at ground level. Special automatic equipment will be used to make various scientific measurements and take samples of the stratosphere. At right above is a comparison of the proposed balloon with the Statue of Liberty. Below are Stevens and Kepner, right. To the left is a graphic sketch of the heights already attained by man, and the goal of Stevens and Kepner.

EX-SERVICE MEN GET \$10,237 ON DELAYED BONUSES

SALEM, Ore. (AP)—Payment of \$10,237 on deferred cash bonuses to 125 Oregon ex-service men was announced here by the World War veterans state aid commission following an approval for the action by Attorney General I. H. Van Winkle.

These payments accrued on approved state bonus applications received prior to July 21, 1933 when the bonus act was repealed. No sums were available for payment at that time.

Governor Julius L. Meier, Major General George A. White and Walter S. Fisher of Roseburg are the majority members of the commission already on record as favoring the payment, which will be brought up for official action at a meeting of the commission on Wednesday, February 14. Other members, whose attitude has not yet been ascertained, are Hal E. Hos, secretary of state, and Prescott W. Cookingham of Portland.

"These are valid obligations of the state of Oregon and must be paid eventually," Governor Meier said today. "Because of that, I know of no better time to make these payments than the present when so doing will not disturb the financial program of the commission and the money will be particularly useful to the veterans receiving same. Many pitiful letters have been received by the commission from applicants whose need is greater now than it has been at any time since the World War. The largest cash payment which will be made to any veteran is \$300; the smallest is \$15.

How to make good coffee everytime

Only 3 things are necessary—a drip coffee maker in which boiling water drips through a specially prepared coffee and filter paper. That's all! And it serves full! Delicious every time! Always crystal clear! In a Drip Maker the water drips through the coffee but one time, not many times as in Percolator. At that one time, all the coffee's fragrant flavors are extracted from a coffee specially prepared for the process. Coffee prepared for the drip process will not do. (Schilling Drip Coffee is specially blended, roasted and ground with filter paper enclosed.) A drip coffee maker is the coffee to let it drip through the coffee.
