The Lord is thy keeper: the Lord is thy shade upon thy right hand.—Psalm 121: 5.

WHY NO INSPECTION OF NEW TRAIN HERE?

For many weeks La Grande people, railroad minded as are few communities between Portland and Boise, have been reading of the building of the new streamlined Union Pacific train with the hope that it would stop here for public inspection. Yet the Observer has learned that when the train is scheduled to go through La Grande it will be sometime within the next six or seven weeks. It will stop at Pendleton for public inspection, but will not be open to the citizenry while going through La Grande—the division point and the largest city in Oregon east of Bend. Unless some change in the schedule is made before the innovation in passenger carriers comes through Eastern Oregon early in April, Union and Willowa people who desire at that time to view the interior of the train, needs must cross the Blue Mountains to our neighboring city 50 miles to the west to satisfy their desires.

Surely the railroad knows well the geographical location of La Grande and this valley and the task of a mountain climb out of this territory to our neighbor town, though only 50 miles away. Surely it knows of the genuine and sincere interest in its railroad welfare and success often expressed and in evidence over this entire valley. And while it is appreciated here that the new train cannot stop for complete inspection at every spot along the line surely, under circumstances evidently not considered in the tentative plans for showing, the new train will be given on the final schedule a longer stop at La Grande for public inspection as well as at Pendleton over the hill.

La Grande basketball fans are looking forward to what promises something quite unusual in that or any of the sports—the spectacle of a bewhiskered bunch of cagers playing on the local court next Tuesday night against the quintet of E. O. N. And despite the splendid record of the House of David players a good game from the Normal Mountaineers is an added prospect unless the game of the visitors is to keep the ball hid in their whiskers.

From latest Washington news dispatches it would seem that the C. W. A. workers may carol "Happy Days Are Here Again" with added vigor. And the tune should echo right on down through the better business cash register just as gleefully.

PRATT TO HAVE BIG TERRITORY

L. C. Pratt, of Juneau, Alaska, government fiscal agent and disbursing officer in the forest service, left Thursday for Amherst, Mass., after a visit in La Grande with his son-in-law and daughter, Mr. and Mrs. Frank Tuckey. He was accompanied by Mrs. Pratt who has been in La Grande since the first of the year.

TO SELL ALLEN HOSIERY LINE

Announcement by Sam Zion, manager of the New York Store here, is that the New York Stores have contracted with the Allen-A Hosiery Co. for distribution of this famous hosiery in La Grande. Mr. Zion is more than pleased with the product as it is so well received by the women who recognize a nationally advertised product as reputable merchandise.

Wholesale Fighting At End in Austria

By the Associated Press
Wholesale fighting was at an end in strife-torn Austria today but the tenacious Socialists began a campaign of guerrilla warfare against the Fascist home guard backbone of government support.

Rays of Stellar Light Bend When Passing Near Sun

TOKYO, Feb. 15 (AP)—Further evidence are bent when passing near the sun—known as the "Einstein effect"—was seen today as a result of solar eclipse photographs taken yesterday by a scientific expedition at Lospay Island in mid-Pacific.

TWO THINGS TO REMEMBER

- 1 REMEMBER to keep smiling.
- 2 REMEMBER that you'll get plenty of mileage and smileage from one of our renewed car bargains. Any standard make. Pay as you drive.

Thursday: Maximum 59, minimum 28 above. Clear.
Today: Minimum 28, 7 a. m. — 39 above. Cloudy.

MRS. BUCHANAN PASSES; FUNERAL WILL BE MONDAY

Mrs. Blanche Buchanan died at the Grande Ronde hospital this morning at the termination of a long illness.

Funeral services will be held Monday at 2 p. m. at the Snodgrass and Zimmerman mortuary, with burial at the Masonic cemetery.

She was born in Henderson, Ky., Dec. 25, 1885, and was 50 years, one month and 22 days of age. She had been a resident of La Grande for many years.

Besides her husband, G. W. Buchanan, she leaves the following children: Owen L., Mrs. Georgia Hamlin, Ralph B., Alvin, and Mrs. Cuba Winter. All of La Grande; her mother, Mrs. David R. Jordan, of La Grande; the following brothers and sisters: Alvin Jordan, of Arkansas; Roscoe L. Jordan, of La Grande; Harvey L. Jordan, of Amber, Wash.; Hugh R. Jordan, of Moscow, Ida.; May Moton, of Dayton, Wash.; Roberta Jones, of Arkansas; and Mrs. Cora Ogden, of Seattle, and seven grand children.

200 REGISTER FOR TWO-DAY CONVENTION

(Continued From Page One)

The dairy control act when it is completed and the herds will be freed of old and diseased cattle, he said. Oregon dairymen have stood for improvement of products and therefore are in accord with the bill passed by the legislature creating the milk control board to stabilize the market, authorize the making of marketing agreements and of codes. It was explained. The board is working so that the producer may make a fair profit above cost of production.

Mr. Harlan stressed the importance of cow-testing associations and stated that statistics show that only two per cent of the cows in the state have been tested. A person who sells milk has an obligation to the public to have cows tested, he said. An educational program is being carried on at present through the Oregon Dairy Council to educate the people of the state to the importance of drinking tested and healthful milk.

J. M. Brandt, of Oregon State college dairy department, outlined the background of the national dairy control act which is under consideration at present, and the discussion was continued this afternoon.

The program for tomorrow morning includes an address on "Farm Credit Administration and the Dairy Industry," by E. L. Potter, head of the division of agricultural economics, U. S. C. "Herd Improvement and its relation to dairymen as a Permanent Industry," by A. J. Glower, editor of Hoard's Dairyman, Ft. Atkinson, Wis., tonight.

The morning session opens at 10 o'clock. At 1:30 o'clock in the afternoon the following speakers will address the convention: A. E. Eigler, secretary of the lower Columbia Dairy Association, Astoria, on the subject, "Possibilities of Increasing Consumption"; P. C. Adams, manager, Oregon Dairy Council, Portland, on "Dairy Council Methods"; Fred Himmwright, Joseph, "Co-operative Marketing of Dairy Products."

Reports of committees will be heard at 3 o'clock followed by election of officers and adjournment.

P. W. A. PROJECTS APPROVED

PORTLAND, Feb. 16 (AP)—A \$264,000 addition to the Eastern Oregon state hospital at Pendleton, and remodeling of the legislative halls of the state capitol in Salem at a cost of \$80,000, have been approved by the state public works administration board here and were forwarded to Washington, C., last night.

ALLEGED SLAYER ILL

KLAMATH FALLS, Feb. 16 (AP)—Herace M. Manning, charged with the first degree murder of Ralph Horan, state representative, was reported ill in his cell at the county jail this morning.

The noted criminal attorney was believed suffering from shock and nervous strain.

"Mary's got a cold again"

Vitamins instead of "onics"—that's the newest health advice. When children catch cold easily, it is usually due to a deficiency of vitamins. To build up the child's resistance to colds and flu, give them more vitamins and minerals. That's why... links to recent discoveries. In a chocolate-covered tablet you can get all the vitamins of 2 teaspoons of high grade cod liver oil. Not only that, but these same tablets bring your child important minerals (calcium and phosphorus). Youngsters take these tablets readily—no fishy taste! Start the children at once on these tablets. Ask the druggist for MCKESSON'S VITAMIN CONCENTRATE TABLETS OF COD LIVER OIL. Be sure you get MCKESSON'S because they're the ONLY one bringing you minerals in addition to vitamins. The package is marked: "Dicalcium Phosphate, 1 Grain." MCKESSON'S VITAMIN CONCENTRATE TABLETS OF COD LIVER OIL are a food, not a medicine! Give them to the children—take them yourself... after meals. Never before have you had such an easy means of building up resistance. See how after a few weeks children have fewer colds, greater resistance to disease, more appetite, more pep and vigor.

TODAY IN BRIEF, IN AND AROUND OREGON

AS CHRONICLED BY THE DAILY LEASED WIRE OF THE ASSOCIATED PRESS

SMITH-HUGHES MONEY ARRIVES SALEM, Feb. 16 (AP)—Payment of \$14,433 for the second quarter of the 1934 allotments of Smith-Hughes and George-Reed funds for vocational agriculture, trade, industry, economics and teacher-training work was received by the state treasurer today from the federal government. The fund will be distributed to the various counties.

SUMMERVILLE TAKES OFFICE PORTLAND, Feb. 16 (AP)—J. T. Summerville today became United States marshal for Oregon.

Summerville retained three deputies who served under John L. Day, and added four others. Those retained were Clarence P. Knox, Lorain C. Cochran and William H. Hedlund. Those he appointed are George M. Watson of Salem, Leo McLean of Macfield, William H. Richard, Corvallis, and Miss Dorothy M. Alder of Portland, who will serve as his secretary.

BLOND GODDESS

A New Serial by Herbert Jensen

Chapter 27
FRANK EXPLORES

The sun had sunk below the horizon. Cautiously he slid into the open outside the ruin. Ahead, where the column of pursuers had gone, he made out a white object above the tree tops.

He drew forth his binoculars and adjusted them. It was the house atop the pyramid reflecting from its altitude the sun. He was closer to the city than he thought,—not more than a mile or two.

He heard a rustle behind him. He whirled, gun in hand. The shadows had lengthened, and semi-obscurely shrouded the ground. The sound was not repeated, but he believed he saw a shadow fade and disappear at the jungle's edge.

An iguana, as large as a cat, drifted across the rocks ahead of him. Doubtfully he hoisted his pistol, and withdrew into the ruin. Time enough to enter the city after dark; meanwhile he would get some badly needed sleep.

The speaking of bats and the soft whispering of their wings awakened Frank. He glanced at the illuminated dial of his watch; it was a little after midnight. He stretched the stiffness from his limbs. He adjusted his clothing as best he could in the darkness, and tightened his belt. He was very hungry.

He stepped into the open and followed in the tracks of the party that had passed the ruin during the afternoon. As he approached the city the trees thinned and gave him scanty cover.

Ahead, he saw a light, a dull glow, that he guessed from its height to be a fire of some kind atop the big pyramid. This was confirmed as he approached the huge mass. He wondered at the lack of edifices on this side.

Doubtfully he gauged the height of the moon, speculating if the two hours light remaining were likely to be of more of a help than a hindrance. He was grateful for the dim illumination a few minutes later when he stepped into the shadow of the pyramid.

He stopped, rigid with astonishment. There, ahead of him, almost at his feet was the white disk of the moon! It took a few seconds for an explanation of this eerie phenomenon to penetrate his mind. It was the moon, reflected in a pool of water. As his gaze adjusted itself to the correct focus, he made out the dim bulk of the pyramid reflected below the lopsided shield that was the moon.

It was a conote! One of those huge cavernous openings that abound throughout the Yucatan peninsula, where the roof of rock, ages ago, had fallen into a natural subterranean reservoir.

Graham dropped to his hands and knees and crawled to the edge. The brink was sharp and the sides almost perpendicular. It made a sort of lake sunk scores of feet below the surface of the surrounding terrain. The conote was a rough oval, a hundred yards long, with a breadth-span of about two-thirds that distance.

The pyramid abutted against the farther end, looming like a grim sentinel of past ages.

HE stepped away from the edge and progressed with infinite caution to the base of the structure. The moon was somewhat behind him, shining upon the massed stone. He saw to his surprise that the pyramid had been constructed so that this side reared itself in a smooth perpendicular line from the lip of the conote.

It would be a terrible fall, thought the American, from the truncated top of the pyramid. An object hurled from that height would have an uninterrupted plunge to the surface of the water.

He rounded the corner away from the pool, and guffing himself with one hand touching the masonry, approached the center of the sharply sloping side. He was in deep shadow. At the center the deep steps began.

He climbed a little way, he rested, listening for sounds of human beings. He progressed slowly but assured himself that no one was about. At the top he peered over the edge.

GUY BYRKIT DIES UNEXPECTEDLY AT UNION THURSDAY

Guy Byrkit, age 55, passed away unexpectedly at Union last evening. He had been in poor health for the past two years. He was at Union visiting friends and was going to meet the stage and return to La Grande when he suddenly had a heart attack and passed away immediately. Mr. Byrkit was found lying on the sidewalk by Joe Barber, of Union.

ELKS PLANNING ANNUAL BALL

The B. P. O. Elks completed plans for the annual ball which will be held on Feb. 22, at the temple, last night at the weekly meeting. The session was short and devoted to regular business to enable the members to attend the American Legion meeting.

Injunction Move Aimed At U. S. Fails To Win

(Continued From Page One)
profits on army-navy airplane contracts. This move is at congressional request.

Whatever the new federal plans, it appeared that the airmail scrap is far from over.

Walter F. Brown, Hoover postmaster general, said that charges of conspiracy and "illegal" acts by his administration, as put forward by his predecessor, were completely lacking in "justification."

Waiving immunity, Brown arranged to tell the senate air mail investigating committee on Monday his version of the tangle.

WARNING TO ENGINEERS

Are you practicing engineering? When violations of Oregon's Engineers' Registration Law are reported to the State Board of Engineering Examiners, their duty is to cooperate with district attorneys in the law's enforcement. The law protects life, health, and property by requiring registration of all persons practicing or offering to practice professional engineering, (mechanical, mining, civil, electrical, chemical or logging engineering).

Public faith rests on engineers' reports. Registration is based upon integrity and ability. For registration information write:

State Board of Engineering Examiners
Railway Exchange Building, Portland, Oregon.

WORKERS NOT TO RECEIVE COMMODITIES

According to latest information received by J. H. Peare, chairman of the Union county C. W. A. board, no more surplus commodities will be issued to persons who have employment with the civil works administration. The commodities, such as pork, etc., will be distributed only to those persons on the relief rolls without work.

Would you use cube sugar to mix a cake?

There are several types of sugar (granulated, powdered, cube). Each is prepared to serve a different purpose. So it is with coffee. There are two vitally different methods of making it—percolator and drip. Each demands a different coffee.

In a drip coffee maker, boiling water drips ONLY ONCE through a coffee specially prepared to yield its flavor QUICKLY. In a percolator, water passes many times through a coffee prepared to yield its flavor SLOWLY. The same coffee can be used for both methods, but like a "Jack-of-all-trades" it is "master of none"—neither drip nor percolator. In one or the other, little things happen. It's a little weak, or a little strong, or a little cloudy, or it has a little less flavor. It's these little things that make or mar good coffee. Be sure to use the correct coffee for each method.

Your grocer has two Schilling Coffees, identical in flavor, but each is specially prepared for its purpose—each one different in blend, roast and grind.

DOMINATING THE 1934 TIRE HORIZON

FREE 2-day demonstration on your own car..

Let us put a set of these new tires on your car. Give them every test for two days. If you are not entirely satisfied, we will take them off and replace your old equipment at absolutely no cost to you. This special introductory offer good for a limited time only.

The New Firestone AIR BALLOONS

Balanced

Again Firestone leads the way in giving car owners greater safety, longer mileage, increased comfort and sportier style. In 1933 Firestone introduced the first balloon tire and now Firestone presents the New Balanced Air Balloons.

Consider these advanced features. Tires, tubes, rims and wheels are accurately balanced at the factory to eliminate shimmy. A new, scientific tread design gives longer mileage and easier steering. The extra area of non-skid in contact with the road prevents skidding—the low air pressure prevents blowouts.

Even with these advantages Firestone Air Balloons are not expensive. With our liberal allowance for your old tires, tubes and wheels they cost but little more than regular balloon tires.

Come in today and get our low prices for bringing your car up-to-the-minute. Then take advantage of our special demonstration offer to prove to yourself that Firestone Balanced Air Balloons will be a profitable investment for you.
