

SOCIETY NOTES

Ladies of 433 Entertain At the Elks Temple At St. Patrick's Dessert Bridge

A St. Patrick's motif was the theme of clever decorations yesterday afternoon at the desert bridge at which the Ladies of 433 entertained at the Elks temple. Dessert was served at 1:30 o'clock at attractive tables.

Gracia Haggerty Weds Baker Man

A marriage of interest to many La Grande residents is that of Miss Gracia Haggerty, of Union, and Clarence Meder, of Baker. A license was issued in Baker yesterday morning but no details have been received here of the wedding.

Study Group To Meet Wednesday

The study group of the Greenwood Parent Teacher association met at the home of Mrs. J. C. Camp Thursday afternoon and discussed topics of interest to parents.

Missionary Group Concludes Year

A large group of members and friends of the Woman's Missionary society of the First Presbyterian church were entertained Friday afternoon at the home of Mrs. A. L. Richardson for the final meeting of the year.

Social Club Enjoys Afternoon

Twelve members of the social club of the L. S. to the B. of L. F. and E. enjoyed an afternoon of sewing Friday at the home of Mrs. Will Paddock.

Mrs. Frees Will Speak at P. T. A.

Mrs. N. W. Frees, president of the La Grande City Council of Parent Teacher associations, will review 'Our Movie Made Children' Monday afternoon at the Central school study group.

Ladies Auxiliary Holds Meeting

After a business session, the L. A. to the B. of R. T. enjoyed refreshments served by Margaret Arnett, La Verne Mason and Addie Nelson Wednesday afternoon at the Eagles hall.

POULTRYMEN FORMS COUNTY ORGANIZATION

At a meeting last evening in the Sacajawea Inn, Union county poultrymen organized the Union County Poultrymen's organization with Tom Buckman, president.

DUNHAM WRIGHT TO CELEBRATE 92ND BIRTHDAY

Tuesday, March 13, promises to be a big day at Medical Springs, home of the Hon. Dunham Wright, 'sage of Medical Springs,' and his daughter, Mrs. Grace Wright Powers and

SOCIAL CALENDAR

- Saturday, March 10
7:30 Rainbow Girls, Masonic hall.
Monday, March 12
2:00 Wakelita club, with Mrs. Joel Richardson.

Baker Couple Married Here

In a very pretty 8:30 o'clock wedding ceremony performed Tuesday evening in La Grande Miss Kathryn McCord, daughter of Mr. and Mrs. O. H. F. McCord, became the bride of Leslie Ritchie, son of Mr. and Mrs. A. Ritchie, of Baker.

Past Guardian Neighbors Meet

The Past Guardian Neighbors of the Neighbors of Woodmen met Friday afternoon with Mrs. Mary Yeske. There were six members present who planned, during their business meeting, for a rummage sale to be held March 17.

County Historical Society to Meet

The monthly meeting of the Union County Historical society will be held Tuesday evening at 7:30 at the Sacajawea Inn. An interesting program is being arranged and as this is the time for annual election of officers, it is hoped that the attendance may be large and an invitation is extended also to all who are interested in the early history of this county.

St. Hilda's Club Entertained

The St. Hilda's club of St. Peter's Episcopal church met Friday afternoon at the home of Hilda Jo Rosenbaum at 4:00 o'clock. The afternoon was spent playing games, then refreshments were served. This club will meet again in two weeks the place to be announced later.

Mr. Powers. On that day, Uncle Dunham will reach his 92nd birthday anniversary and open house will be observed all day. All friends of Mr. Wright, members of the several pioneer and historical associations of the county, are urged to go to Medical some time during the day and pay their respects to this honored pioneer. The roads are reported to be good, and with favorable weather, the crowd should be very large.

MEDICAL MEN OF EASTERN OREGON HEAR DR. KINGERY

Dr. Lyle B. Kingery, of Portland, dermatologist, presented a study of 'Common Skin Diseases,' before 18 members of the Union, Wallowa and Umatilla county medical societies at Hot Lake sanatorium last night.

Menus Of The Day

By Mrs. Alexander George. BAKED APPLE SUGGESTIONS To give variety to baked apples, stuff centers with dates, figs, raisins, nuts, coconut, peanut butter, prunes or marshmallows.

NAME INSPECTORS IN GRAIN PROGRAM

One inspector will work in each district in the county to conduct the preliminary inspection in the wheat allotment program. It was decided Friday afternoon when the wheat allotment board met at the office of H. G. Avery, county agent, at the federal building.

The duties of the inspectors will be to inspect the signers of reduction contracts to insure their being thoroughly cognizant of the requirements. The inspection will start next week, it is believed.

TWO EGG GRADING DEPOTS HERE TO BE ESTABLISHED

Two new egg grading depots are to be in operation here, probably Monday, according to announcement today. One will be at the Blue Mountain creamery and the other at the former Grande Ronde Co-operative creamery.

Nearly all the grocery stores have agreed to support this plan and these stores will insist that all eggs retailed by them be taken to the egg depot to be candled, graded and cartoned. These stores will in turn purchase their eggs only from the depot. There remain two or three grocery stores who have not endorsed this plan.

Legionnaires of Two Counties to Gather

(Continued From Page One) signing up 15 new members between the 15th and 31st of the month will receive a suitable citation from national headquarters.

PRISONERS MAKE BULLETS USED BY SEATTLE POLICE

SEATTLE (AP) - Prisoners make the cartridges that Seattle policemen use. L. M. Norris, police department firearms instructor, supervises reloading of every cartridge fired in revolver practice on the target range. The old metal casings are reprimed, recharged with powder and have lead slugs extracted from targets inserted after reshaping. Last year prisoners under his direction made 14,000 cartridges, saving the department one-half on each shell.

Bit of the Far East for 1934 Exposition

In the extensive remodeling and elaboration of the Japanese government buildings and exhibits for the 1934 Century of Progress Exposition at Chicago the added attractiveness of the gardens is a prominent part. So much that is new in the gardens, the buildings and the exhibits will be shown that the 1934 visitors will not recognize the complete exhibit as one they saw last year.

Menus Of The Day

By Mrs. Alexander George. BAKED APPLE SUGGESTIONS To give variety to baked apples, stuff centers with dates, figs, raisins, nuts, coconut, peanut butter, prunes or marshmallows.

Menus Of The Day

Tomato Juice Cocktail, Chicken Henri, Boiled Rice, Hot Rolls, Plum Jelly, Asparagus Salad, Bettina Salad Dressing, Sponge Cake, Coffee, Tomato Juice Cocktail, Serving Six (Serve Chilled).

Americans own 72 per cent of the 33,000,000 motor vehicles in the world.

Health COLIC IN INFANTS

Infants are notoriously subject to attacks of colic. Simple regurgitations of food need not disturb the mother for in the infant the gastrointestinal tract does not appear to have made up its mind as to which way it is going, up or down.

Infantile colic may be due to several varieties of causes. Underfeeding is a fairly common one. When due to this the child not only suffers colic, but is usually also restless, does not sleep well, loses weight, and may suffer diarrhea.

The remedy for this type of colic is an increase in food given to the child through an increase in the number of feedings, their duration or their content.

Another fairly common cause of infantile colic is overfeeding. In this condition the child gains rapidly in weight, may also suffer periodic attacks of diarrhea.

Air swallowing is another cause of colic, common in children who feed too rapidly. A remedy is to place the infant, after it has been fed, so that its abdomen rests squarely against the mother's shoulder, and patting it gently on the back.

In addition to those causes of infantile colic and vomiting which are dietetic and managerial in character, there are organic causes, and one is pyloric stenosis.

In this condition the end of the stomach which unites with the small intestine, that is, the pylorus, is thickened and contracted, and does not permit the passage of food into the small intestine. This condition calls for medical and frequently also for surgical treatment.

MALFORMED INFANTS

The birth of a malformed infant is a multiple tragedy usually affecting not only the parents and the malformed child, but the other members of the family circle as well. It is natural, therefore, for medicine to have devoted much study to the subject of the causes of malformation.

A British scientist has made a careful survey of the factors which entered into 294 fetal malformations occurring in a series of 13,994 deliveries. These malformations included such disabilities as harelip and cleft palate, mongolism, and defective structure of the brain, the nervous system, the spinal column and club-foot.

The 294 infants were almost equally divided as to sex. In comparing the frequency of certain types of malformations as they occurred in males and females, it was found that only those malformations which involved the brain were in excess among the females.

Many factors that might enter into the cause of the fetal malformations were studied. The close blood relationship of the parents, such as being first cousins, appeared to play no role whatsoever in the causation of malformation.

In only one instance in the whole series was a definite hereditary bias observed.

This was a case in which a child was born with webbed toes, and in which both the mother and the mother's grandfather had a similar malformation. On the other hand, in 4 per cent of the instances there occurred a second case of malformation within the immediate family.

The things of interest that came forth from this study were that syphilis in the parents appears to bear some relationship to the production of malformations.

Also, poor physique in the mother, the advancing age of the mother, and the frequency and number of pregnancies which she had undergone, are significantly related to malformations.

Seaweed trade associations of Tokyo have joined with the governmental marine products research bureau to institute experimental work to improve the yield of seaweed in Tokyo bay and other rearing grounds.

AT THE LIBERTY

Jimmy Cagney plays the perfect gentleman to Margaret Lindsay in this scene from the new Warner Bros. hit, 'Lady Killer,' opening Sunday at the Liberty Theatre. Jimmy plays six different roles in this film, as he traces the rise of a movie usher to stardom. Mae Clark heads the sterling supporting cast.

Styles Like Clothing Worn In Louis XV Time

A gunman's moll and a movie star form the feminine members of a triangle which causes James Cagney's screen life to run anything but smooth in his latest starring picture for Warner Bros., 'Lady Killer,' which comes to the Liberty theatre on Sunday.

Mae Clark, who first leaped to fame when Jimmy bathed her in the eye with a grapefruit in 'Public Enemy' two years ago, is Cagney's underworld sweetheart whom he tries desperately to shake when he rises to screen fame and falls in love with his leading lady, a role enacted by Margaret Lindsay.

But Mae is not the type of girl to be lightly dismissed and one night when Jimmy is away she crawls into his bed, hoping to give him a nice surprise when he returns. But when Jimmy brings the film star back with him to see his apartment the surprise results in Cagney's losing out with the movie queen.

The picture is based on a story by Ronald Keating Shaffer, which is a hilarious take-off on the Hollywood film colony, relating the astounding rise to screen fame of an ex-crook by a unique publicity stunt. There are also said to be plenty of thrills furnished by his ex-gangster pals who are bent on blackmailing the successful star.

Others in the cast include Henry O'Neill, Leslie Fenton, Russell Hopson, Raymond Hatton, Douglas Dumbrille, Marjorie Gateson and George Blackwood. The picture was directed by Roy Del Ruth from the screen play by Ben Markson and Lillie Hayward.

DR. O'CALLAGHAN SOUGHT FOR FOUR OF U. S. AS PRO DUBLIN (AP) - Dr. Patrick O'Callaghan, Irish Olympic hammer champion, may return to America - as a professional.

Reports are current here that the champion has been offered \$3,000 yearly (\$29,180 a pay) to drop his amateur status.

O'Callaghan has declined to comment on the matter. His striking athletic build and breezy manner, it is pointed out, would make him a good drawing card for exhibitions in the United States.

PIN-TUCK FEATURES BLUE WOOL FROCK WASHINGTON (AP) - Mrs. Mary Harriman Rumsey of the consumers' advisory board wears a smart day frock of soft blue wool trimmed with a pin-tuck amburst effect about the shoulders. Two tiny fox heads trim the ends of a long Ascot tie. She wears a hat of darker blue with the frock, trimmed with a bright feather.

Adjusting automobile radio sets to receive aviation weather reports as an aid to driving is suggested by a government official.

It has a shirred bosom of white pique and a collar of the same fabric. Afternoon coats appear in reversible satin - black on one side, dull rose on the other - designed on slender fitted lines. A number of day coats appear with belts made of shimmering cords.

Accessories, so important an item in this spring's mode, are colorful and striking. Pale pink organdy tricot ties with wings outlined in glistering black threads perch on the necklines of black afternoon frocks. Brown taffeta gloves with elastic satin palms appear with green wool street costumes. Domino and dice buttons fasten street and sports coats.

Pique For Sports Sports suits appear in crisp linens and piques brightened by colorful accents. Costumes of beige crinkled linen, combining slender skirts and loose three-quarter length coats, are worn with short sleeved blouses of multi-colored pique or bright plaid cotton.

A pale blue cotton pique costume which united a short sleeved frock and hip jacket has bright red stitching on yoke and coat hem.

JUGOSLAV CRITICS PRAISE AND ATTACK U. S. WHEAT BELGRADE, Jugoslavia (AP) - American varieties of wheat which resisted rust and other diseases have saved many farmers from ruin, say reports from many agricultural centers. Nevertheless, these select and very productive varieties again are under fire as 'unworthy of the high standard which characterizes Jugoslav wheat.'

The critics say the old-fashioned 'steel-wheat' of the Thebes and Banat regions - taken from Hungary and given to Jugoslavia by the peace treaties - is well famous for the high quality flour it produces, and that while American wheat grows twice as much per acre the bread produced from it is not so good.

The Belgrade Central Hygiene Institute, however, says that American wheat acclimated to Banat and Thebes conditions stands the bread-baking test as well as the old-fashioned, scanty-crop, local varieties.

A French steamer took on 1,000 tons of oak staves for wine casks at Beaumont, Tex., consigned to Algiers and other trans-atlantic ports.
