## Auxiliary To Eagles Meets

The Eagles auxiliary met Wednesday afternoon with Mrs. Mae McClain with 22 members present. Sewing and cards occupied the afternoon followed by delicious refreshments served by the hostess. The auxiliary will meet again in two weeks. It was announced that the Eagles and the auxiliary would give a Mother's day program Sunday evening, May 13, in the hall beginning at 8:00 o'clock to which the public would be welcomed.

# Firestone LEADERSHIP

*"The Ultimate Test of Leadership is Performance"*

FIRESTONE has maintained its leadership in tire development by producing a new tire for 1934 with a wider tread, flatter contour, deeper non-skid, greater thickness, and more and tougher rubber, which gives greater non-skid safety, more traction, greater blowout protection, and more than 50% longer non-skid mileage.

These achievements are made practical by the Firestone patented process of Gum-Dipping, providing greater adhesion between the plies of the high stretch cords and between the Gum-Dipped body of the tire and the tough, massive non-skid tread. It also provides greater strength, longer flexing life, and greater protection against blowouts.

Gum-Dipping made it possible for Firestone to design, develop and put on the market the first successful balloon tire in 1923. This tire was the pattern used by all others and completely revolutionized the tire industry and set new standards for the automobile industry.

Firestone also developed the first all-rubber non-skid tire, and has always been first to give motorists the benefits of new discoveries in non-skid design, providing more traction and greater non-skid safety.

For fourteen years leading race drivers have driven to victory on Firestone tires, built with Gum-Dipped high stretch cords. They have trusted their lives to Firestone Leadership—as they know that the patented Firestone construction features provide them with greater safety—longer mileage—and greater blowout protection.

Protect yourself and family by driving in today and replacing your smooth, thin, dangerous tires with the new Firestone High Speed Tires for 1934.

**MORE THAN 50% MORE NON-SKID MILEAGE**

Firestone Tires are Track Tested on the largest fleet of Firestone test cars, day and night every day in the year, over all kinds of roads and highways.

## "Take no chances after this"

"Always look for that shield of acceptance of the American Medical Association."

The Seal of Acceptance of the Committee on Foods of the American Medical Association is your best guarantee of the quality of any product and the truthfulness of the advertising claims made for it. Look for this seal on every food you buy; it is there to safeguard you and your family.

White Star Tuna has this acceptance. Because of its uniform high quality; because only the tender light meat is packed; because it contains Vitamins "A" and "D," iodine, that effective preventive of nutritional goiter, and other valuable minerals.

White Star has been the preferred tuna for 21 years. More of it is sold than all other brands combined. And... it is the one food delicacy that costs no more than "staple" foods!

For 21 years the preferred brand, because only the finest of the catch is packed.
