EASTERN OREGON COUNTIES GETTING PRODUCTION LOANS

W. E. Moore, secretary-treasurer of the production credit association has received word from S. M. Garwood, production credit commissioner of the farm credit administration in Washington, D. C., that about $35,000,000 in production loans and approvals has already been granted through associations and that the volume of loans is expected to increase as the season advances.

"A part of this money has been paid out in Union county," Moore said. "From its office in Pendleton the association is now making an increasing number of loans to farmers in Union, Morrow, Wallowa, Grant and Umatilla counties, for the purpose of growing crops and for purchasing work-stock and farming supplies for the season's operations. The loans are made on crop and chattel security.

"A number of the loans are being made on the installment basis," Moore added. "An applicant's loan may be approved in the full amount, but paid out in installments as needed during the season, the object being to enable the borrower to save on interest costs and be sure of having the money when he needs it throughout the season to finish his crops or livestock operations. The interest rate on loans, recently reduced to 5 per cent per annum, is charged only for the time the money is being used and payable when the loan is due. Some farmers are saving from one-fourth to one-half on interest costs by getting loans on an installment basis.

"Another new feature of the production loans allows a farmer or stockman to apply for a loan and establish a line of credit which is used to make cash purchases of livestock or work-stock, the association taking a chattel mortgage on the stock purchased as part of the security for the loan.

"The association was organized under the farm credit administration to be a permanent source of agricultural and livestock credit for this section," Mr. Moore said, "and it now has facilities capable of fulfilling that purpose."
