Here Yesterday—D. E. Stephens, of Moro, was a business visitor in La Grande Tuesday.

At The Cove—Mrs. Harris French and Mr. and Mrs. R. Z. Baxter and son, were

YOUR GROCER WILL HELP YOU KEEP HEALTHY AND HAPPY

Delicious Cereal Promotes Regular Habits

The right kinds of foods form the very basis of health. You need nourishment for strength and energy. And you need "bulk" to prevent common constipation.

Otherwise, this ailment may cause headaches, loss of appetite and energy. You can correct it, usually by eating a delicious cereal.

Kellogg's ALL-BRAN adds generous "bulk" to your daily menu. Tests show this "bulk" is similar to that found in leafy vegetables.

Inside the body, the fiber of ALL-BRAN absorbs moisture, and forms a soft mass. Gently, this clears out the intestinal wastes.

ALL-BRAN is also a good source of vitamin B and iron.

Isn't it safer—and pleasanter—to enjoy this food in place of taking patent medicines?

Two tablespoonfuls of ALL-BRAN daily will overcome most types of common constipation. Chronic cases with each meal. If seriously ill, see your doctor. ALL-BRAN makes no claim to be a "cure-all."

Serve ALL-BRAN as a cereal with milk or cream, or cook into fluff, muffins and breads.

Remember, Kellogg's ALL-BRAN is all bran with only necessary flavoring added. It contains much more needed "bulk" than part-bran products. Get the red-and-green package at your grocer's. Made by Kellogg in Battle Creek.

stay there she enjoyed a trip to the coast and another into the Cascade mountains.

At Crater Lake—J. P. Hogenen of this city is now located at Crater Lake where he is stationed as road foreman for the C. C. camp near there.

'SOUTH POLE OF COLD' IN ANDES MOUNTAINS
WASHINGTON (AP)—The "south pole of cold" is not in the Antarctic, but hundreds of miles nearer the equator in the Andes mountains of South America.

It is the second most frigid spot on earth, with temperatures often as low as 70 below zero, comparable to the "north pole of cold" in Northern

Siberia, says Director Navarrete of the Chilean weather bureau in a report of the monthly weather review of the U. S. weather bureau.

This cold spot is a region about 60 miles wide, in the Andes mountains of Northern Patagonia, along the Chilean-Argentine frontier. It is a place of deep valleys with high mountain walls, an ideal repository

for the chilled air from the Antarctic that settles into it from higher levels.

Would you use cube sugar to mix a cake?

There are several types of sugar (granulated, powdered, cube). Each is prepared to serve a different purpose. So it is with coffee. There are two vitally different methods of making it—percolator and drip. Each demands a different coffee.

In a Drip Coffee Maker, boiling water drips only once through a coffee specially prepared to yield its flavor quickly. While in a Percolator, the water continues to pass many times through a coffee prepared to yield its flavor slowly. The same coffee can be used for both methods, but like a "Jack-of-all-trades" it is "master of none"—neither drip nor percolator. In one or the other, little things happen. It's a little weak, or a little strong, or a little cloudy, or it has a little less flavor. It's these little things that make or mar good coffee. Be sure to use the correct coffee for each method.

Your grocer has two Schilling Coffees, identical in flavor, but each is specially prepared for its purpose—each one different in blend, roast and grind.

Two Schilling Coffees

Percolator Coffee
Drip Coffee
