Statue Of Roman Empress Found—NAPLES, Italy (AP)—A statue of Faustina Juniore, wife of the philosopher emperor, Marcus Aurelius, was found by excavators at Linterno, near here. It was perfectly preserved, archeologists said, by even pressure of earth around it through the centuries.

PHILADELPHIA (AP)—A rat with a permanent wave and a curly coat has been developed in breeding experiments by Dr. Helen Dean King at Wistar institute. The curly rats appeared during breeding experiments which seek more information about the laws of heredity. Although commercial uses are outside her aims, Miss King has suggested that rats with curls or unusual coloring might have commercial value for furs. Among her rats are breeds with chocolate, cinnamon and pale lapin-colored coats. In 20 years of study she has found evidence that the mutations — the changes which produce new varieties of plants and animals — occur most frequently among rats in the litters of very old or very young parents. This indicates to her that the germ cells of very young or very old mammals act more variably than those of animals in middle age.

The picture of life in a great modern hospital is one that has been painted again and again on stage and screen, so that the sheer phenomena of hospital activity are no longer secrets to anyone. But rarely has this been shown with any point of view beyond the idea of revelation and exposure. In "Men in White," the new Metro-Goldwyn-Mayer film co-starring Clark Gable and Myrna Loy, now playing at the Liberty theatre, the medical background is used in vivid and thorough detail but only as an illustration of the conflict in the life of a young interne.

Plans to Marry—Clark Gable appears as Dr. Ferguson in "Men in White," a young interne who realizes all the obligations of his profession but has not yet been able to resign himself to the deprivation of a personal social instance. His love for a society girl (played by Myrna Loy) is something he considers entirely natural; he plans marriage and a vacation abroad. Ironically, and unfortunately, it is his very talent and promise as a surgeon which brings about an impasse, for, the surgeon under whom he is working (a role taken by Jean Harsholt) objects strenuously to his taking any time out from the studies which will take him years and years before he can call himself a good surgeon. Out of all this conflict grows an important realization about sacrifice and devotion to the cause of caring for humanity's ills.

and Los Angeles where they will visit. Both Miss Eberhard and Miss St. Clair are teachers in the high school at Klamath Falls and since the close of school have been on a trip up the Oregon and Washington coast, and to Victoria and Vancouver, B.
