## La Grande Junior Ball Team to Open Season on Sunday

The Junior league baseball season will open in La Grande Sunday with the La Grande team which is sponsored by the American Legion, pitted against the champion Walla Walla team. The visitors won the state championship for the state of Washington last year and the local lads were runner-up for the championship of this district during the same season.

The local team is composed of the best players available in the county under the age of 17 years, according to Ray Williams who is managing the team for the American Legion as chairman of the committee of that organization.

This is the first game of the season for both teams and it is expected to be fast and interesting as it is thought that the teams are well matched.

The starting line-up for La Grande is as follows: catcher, Walden; pitcher, Koyle; first base, Robertson; second base, McCoy; short stop, Pratt; third base, Allen; right field, J. Biggs; center field, Arnold; left field, Leonard. Other members of the team are Miller, Dunn, B. Biggs, Blackman and Courtney.

The game is scheduled to begin at 2 p. m. and will be played on the high school athletic field.

## LOST 20 LBS. OF FAT IN JUST 4 WEEKS

Mrs. Mae West of St. Louis, Mo., writes: "I'm only 28 yrs. old and weighed 170 lbs., until taking one box of your Kruschen Salts just 4 weeks ago. I now weigh 150 lbs. I also have more energy and furthermore I've never had a hungry moment."

Fat folks should take one half teaspoonful of Kruschen Salts in a glass of hot water in the morning before breakfast — it's the SAFE, harmless way to reduce as tens of thousands of men and women know. For your health's sake ask for and get Kruschen at Glass Drugs Inc., L & L Drug Co., Red Cross Drug Store, Moon Drug Co., or any drugstore—the cost for a bottle that lasts four weeks is but a trifle and if after the first bottle you are not joyfully satisfied with results—money back.

**Here Is Real Farm Relief!**  
Growth of the Beet Sugar Industry Has Been a Form of "Farm Relief" that Really Works!

Every acre planted to sugar beets (and there are millions each year) removes an acre of highly productive land from production of surplus crops. Every acre of sugar beets displaces an acre of grain or potatoes or alfalfa or some other crop whose price is depressed by overproduction. Every acre of sugar beets removes that acreage from competition with other crops in this territory. There can be no over production of sugar beets because the American market can absorb four times the present production.
