Out of 3,743 weddings in Milwaukee last year, the knot was tied in 3,043 instances by ordained ministers, with justices of the peace and judges dividing the remainder.

WISCONSIN PREP PITCHER FANS 13 IN FOUR FRAMES

OAKLAND, Wis. (AP)—A baseball believe-it-or-not.

Roy Flurry, pitcher of the Oakland high school nine, struck out 13 batters in four innings, which sounds like a mathematical impossibility in view of the fact that four times three make 12.

Flurry whiffed all three batters for three innings, totaling nine. In the next frame he fanned the first man, then gave a base on balls. He fanned the next man, but when the catcher dropped the third strike the batter reached first, as the catcher feared to throw to first for fear the other runner would score.

Flurry retired the next two men.

ST. CLOUD, Minn. (AP)—Although this city is far removed from the primeval wilderness of the far north, it is still in the deer country.

Recently a milkman, making his rounds, observed a deer grazing on a vacant lot well within the city limits. The milkman awakened neighbors for confirmation of his experience.

PILLOW EVENT

How Old Are Your Pillows?

Most people have the idea that "Bed Pillows" never wear out. There never was any greater fallacy.....

Think of the unsanitary condition of a pillow that people have been breathing into for a period of years. After several years' use, feathers in any pillow become brittle and break. Old pillows become flattened and do not permit proper sleep.

Healthful, restful sleep, is the most important function of the human body. You MUST have restful sleep to be efficient. To sleep well you must have a good bed spring, a good mattress and particularly a good pillow.

Look at your pillows tonight—give yourself a report on how you feel tomorrow morning—then decide if you are enjoying restful sleep.
