EFFICIENT SERVICE

Mrs. Alice Margardt Zimmerman, who has been county health nurse here for the last 11 years, will conclude her duties Sept. 1, giving way to a new appointee chosen by the county court to fill the place to be left vacant by Mrs. Zimmerman's resignation. Mrs. Zimmerman has given the county excellent service during her period in office, and is deserving of much commendation for her efficiency and conscientious work, work that has brought untold benefits to many individuals, to many families and to every section of the county. It is with regret that we hear of her resignation, yet with delight that we learn that her successor, Miss A. E. Erickson, comes here well qualified to take up where Mrs. Zimmerman will leave off.

TRAINING THE JUVENILES

With the first playground movement completed, and so successful that an association has been formed to continue the program from year to year during the summers, with two boys' camps held near here this season, and with other similar activities on a smaller scale, farseeing observers believe that a decided upward step in community betterment is being taken. Already the results are apparent through a marked lessening of juvenile delinquency this year, according to the police. And as years pass, even greater results in the moral welfare of La Grande should come to view. It seems beyond question that supervision of the juvenile in the community in both work and play, linked with proper school and parental co-operation is probably the greatest single factor in upbuilding the youthful character.

Supt. Evans recommended that a spring vacation be held, adding that this would make the closing day of school next spring May 31. The board authorized a spring vacation.

The question of school health was discussed, with Supt. Evans remarking that 16 pupils were dropped from school last year because of ill health. Directors Ingle and Frees and Supt. Evans were appointed to interview the new health nurse, Miss A. E. Erickson, in this connection.

Supt. Evans reported that 38 teachers during the last year visited 592 parents in connection with difficulties their children were experiencing.

Supt. Evans also asked for authority to obtain special reading tests applicable both to grade and high school, which are recommended by educational authorities as certain to improve reading in schools where used. Following the tests, pupils would be divided into different reading groups, so that those who required additional help would receive it. The superintendent's recommendation was approved.

The board also authorized cleaning of boilers, flues, etc., in the schools, and awarded the work.

Several other routine matters were discussed or acted on during the evening.

Future Policy On Drouth, Farm Relief Now Being Formed

(Continued from Page One)

fore the country within the next few days a statement of future policy on drouth and farm relief.

There are indications that it may include an answer to critics of the AAA's crop production, some of whom have been stressing drouth devastation to emphasize what they call the "art" of artificial slashing of food supplies.

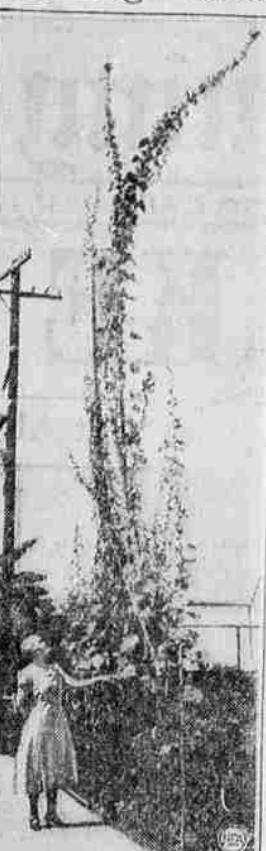

AAA officials have been touring the country, answering this criticism. Secretary Wallace stressed yesterday that, though the AAA sought large cuts in production before the drouth came along and slashed crops indiscriminately, the aim of "control" is not necessarily smaller crops.

"We always contemplated a program which was one of adjustment," he said. "It is not exclusively one of either reduction or increase in acreage. You'll find I'm on record—back in May—on that."
A rise in the general cost of living, but especially foodstuffs, is considered likely this winter and the government is pushing preparations for its anti-profiteering campaign with war-time vigor.

CHICAGO, Aug. 14 (AP)—The drouth's long siege appears to be lifting. Six agricultural states benefited by rain which fell over the weekend, and forecasters said precipitation should come more frequently during the rest of the season.

About \$300,000 will be spent in repair work on school buildings in the lower Rio Grande valley of Texas which were damaged by the 1933 hurricane.

This Hollyhock Has High Ideas

It's a slight but the way hollyhocks grow for Mrs. H. C. Perlevere of Los Angeles. This one, tied to a support, measures 30 feet from ground to tip. It was only a few feet tall last year when its sensational growth began. Now it's owner is claiming a world record for it.

Chicago, because of its improved financial condition, is paying the back salaries of its school teachers. Philadelphia is in 'better condition than at any time since the depression started,' City Controller S. Davis, Wisconsin reports. He predicted there would be no deficit this year, against deficits the last two years.

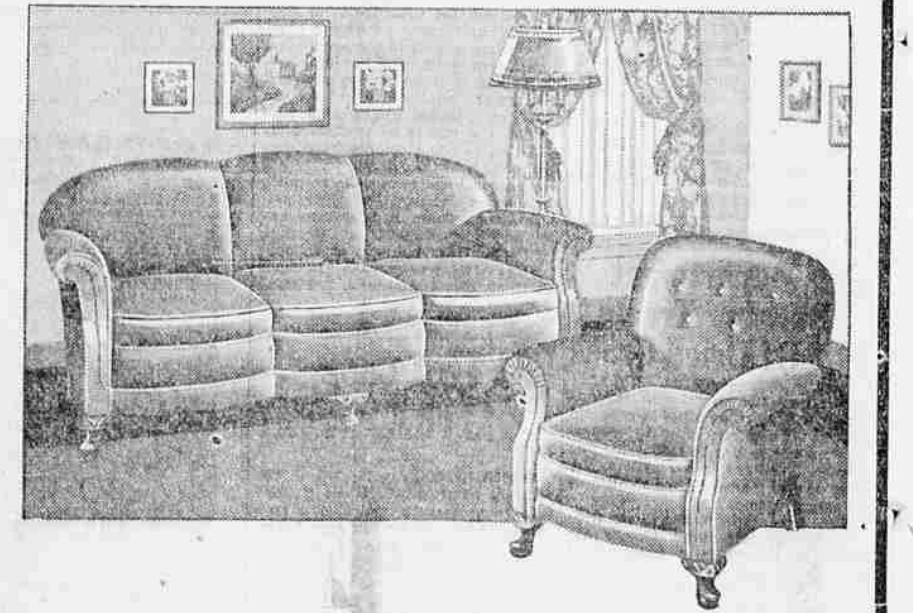

New York City's credit has improved so much the city was able to sell \$3,000,000 in 90-day revenue bonds at an all-time record low rate of interest of three-fourths of one per cent. New York's long term bonds are at par again for the first time since 1931.

Boston's interest on temporary borrowing is the lowest in 25 years. Delinquent taxes jumped from \$300,000 in 1931, to \$11,344,000 last year. Detroit's operating deficit in July was \$8,740,000 against \$11,300,000 in July of last year and the city hopes to reduce it another \$4,000,000 by the end of the fiscal year.
