Joseph Wedding Has Local Interest

Miss Anna Mary McKinley, of Joseph, a teacher for the past few years at Ontario, was married to Wilburn Swafford, of San Francisco early this week. The bride of the event is very well known in this county and the account of the pretty ceremony has considerable local interest.

The home of Mr. and Mrs. A. M. McKinley was the scene of a lovely wedding at 2:30 p. m. Sunday when their daughter, Miss Anna Mary McKinley, became the bride of Wilburn Swafford of San Francisco, Cal.

The ceremony was performed by Dr. J. Edgar Purdy, pastor of the First Methodist church of Moscow, Idaho, in the presence of relatives and a few friends of the bride and groom. Preceding the ceremony, William Wiseman of Parma, Idaho, sang "Because" with Mrs. Wiseman as his accompanist at the piano. At the conclusion, the bridal party entered the room to the strains of the Lohengrin wedding march played by Miss Betty Lou Hager of Ontario, Ore.

The bride came down the stairway and entered the living room on the arm of her father. She wore a dress of white shadow crepe, with a white veil and white gloves and carried a bouquet of sweet peas and roses. Miss Ruth Hampson of Bend, a cousin of the bride, was her only attendant and was charming in a dress of apricot organza. Little Esther Perkins of Salem, a niece of the groom, prettily dressed in pink and white organza, was flower girl. The groom entered the room from the dining room with Albert McKinley Jr., brother of the bride, as best man. The bridal party met at the fireplace which was beautifully decorated with baskets and bowls of sweet peas, asters and other seasonal flowers. Mrs. Wiseman sang "I Love You Truly" just before the ceremony was performed, accompanied by Miss Hager.

Following the ceremony a reception was held between the hours of 3 and 4 o'clock to which friends of the couple were invited. Mrs. Edward Purdin, Mrs. E. W. Humble, Mrs. G. R. Archer and Mrs. S. D. Houck cut ices and the Misses Frances Amey, Maxine Wright and Eleanor Dawson assisted in serving ice cream, cake and punch.

Immediately following the reception the couple left in their car for their new home in San Francisco, where Mr. Swafford is employed as a chemist by the Hercules Powder company. For her going-away costume the bride wore a brown hat, a brown ensemble suit with cream lattice trimming and brown accessories.

The marriage was the culmination of a romance which began when the couple were students at Willamette university in Salem, where they both graduated in 1929. Mrs. Swafford has been English and foreign language instructor in the Ontario high school for the past five years. Both bride and groom have a wide circle of friends who wish them success and happiness.

Annual Meeting Of Recital Club

The annual meeting of the La Grande Recital club is being announced for Monday evening and will be held at the Sacajawea Inn. The junior members will meet at 7:30 o'clock and the seniors at 8:00. As this will be the time for the annual election of officers, Mrs. Parkinson is asking for a representative attendance.

Salem Visitor Guest at Party

With Miss Helen Trindle, of Salem, as a special guest, a group of friends enjoyed a picnic party last evening at Riverside park with bridge following at the home of the Misses Mae Stazius and Mabel Doty. Miss Trindle received a guest prize while other awards went to the Misses Anetta Johnson, Bertha Wallinger and Mabel Morton.

Kilkare Club At Shepherd Home

There were two tables for bridge when the Kilkare Club was entertained Friday evening at the home of Mrs. F. L. Shepherd, 604 N. avenue. Mrs. Julia Miller made high score and Mrs. Blanche Stokke, second high. Refreshments were served.

Mrs. Bertha White will be the next hostess on Friday evening, Sept. 7.

Mrs. Bohnenkamp Hostess at Lake

Mrs. W. H. Bohnenkamp Sr. entertained Friday evening at her cottage at Wallowa Lake where she has been spending the summer. Mrs. Tom Boylen and son, Tom, and daughter, Jaylene and Mrs. Rex Kay, of Pendleton, Mrs. James Corbett Jr. and twin sons, Billie and Bobbie, of San Luis Obispo, Cal., Mrs. J. C. Gulling, Mrs. Mary Moran and the Misses Mary Jean and Peggy Bohnenkamp, who have been spending the week at the resort.

Everready Class Picnics in Valley

Members of the Everready class of the Christian Sunday school went to the country home of Mr. and Mrs. Ralph Stringham in the Grange Hall Friday evening for one of their splendid parties. There were around 30 members of the organization present for the event which started off with a picnic supper and was followed by an evening of games. A short business meeting presided over by the president, Bennie Hicks, concluded a most successful party.

K. D. Club Women Are Entertained

The K. D. club met at Riverside park on Wednesday with Mrs. Lyle Winburn and Mrs. Margaret Blystone as the hostesses. A number of contests were planned which furnished considerable entertainment and amusement and at which Mrs. Lucy Winburn and Mrs. Agnes Winburn were most successful and received the prizes. A luncheon was served.

The United States is said to be second among the "big five" in number of planes while John Bull's squadrons are rated very high because of general efficiency. Italy's aerial fleet is among the finest while Japan ranks high both in numbers and reputed effectiveness.

Movie Stars In Need of Poise More Than Looks

HOLLYWOOD—Girls can get along in pictures without beauty, and some of them can stay in the running without superfluous talent. There's one quality, however, that is indispensable. They call it poise.

The very young actresses, with South Sea prettiness written all over her, may survive without it for a while, but she strives constantly to acquire it. The older woman, and those less beautiful, has scant opportunity without poise.

Some of the players who apparently have acquired it maintain that nothing perfects the quality so well as stage experience. On the other hand, there are women with little or no stage background who stack up with the best when it's a question of cool self-confidence in manner and bearing, the ability to meet situations as they arise.

Bette Davis tells this story of her own experience in acquiring poise. When she was very young, she played with Richard Bennett in "The Solid South." Bennett in those days had a habit of interrupting a play to lecture the audience over some real or imagined rudeness—while the other players stood and waited.

"Once you've stood speechless, facing an amazed audience while Mr. Bennett spoke his mind," says Bette, "your self-consciousness is pretty well squelched."

Joan Crawford's stage experience was mostly in dancing, which is supposed to aid poise, but she was a self-conscious youngster when she came to Hollywood. Today she is a self-possessed young woman—a case of a girl who lifted herself by her bootstraps into poise. New interests and intelligent effort accomplished the change.

Revolutionary Calm Dolores Del Rio's girlhood in Mexico was marked by the protection of convents and a guarded home, but even these could not keep out the reverberations of revolution. Nervousness by character—building experiences aided her to acquire a certain calmness of spirit. As a Mexican society girl she was presented to royalty—to King Alfonso of Spain, which may have helped in spite of the cultivation of poise.

When Kay Francis entered the theater, she was tall, ungainly, unsure of herself and possessed of a certain impediment of speech, she has often said. She set out deliberately to acquire poise and calm. How she did it she hasn't revealed—but if she's self-conscious today, she hides it perfectly under a mantle of poise.

Alma MacMahon's recipe for acquiring poise is simplest: "Nothing," she says, "equals really facing people."

DETROIT (AP)—Here's a little ammunition for those baseball fans who espouse the theory that right-handed batters have better success against left-handed pitchers than batters who swing from the south side of the plate, and vice versa: In a game here which the Tigers won from the Washington Senators, 4 to 3, Detroit made eight hits off the southpaw slants of Wally Stewart—and seven of the eight blows were struck by right-handed swingers. Greenberg, Owen and Rogell got two apiece and Fox one.

Charley Gehring was the only Detroit who nicked Stewart while swinging from the first-base side.

When Mel Ott of the New York Giants scored six runs in the 21-4 slaughter of the Phillies he equalled a record set in 1899 by Clarence Beaufort of Pittsburgh for runs by one man in a nine-inning major league game.

BEST AIR FORCE IN WORLD GOAL OF U. S. PLANNERS

WASHINGTON (AP)—An aerial combat force second to none is the goal of government planners who are concentrating attention on America's flying strength.

Plans call for an army air corps fleet of 2300 planes and a naval force of 2,000 planes, which would put Uncle Sam's air strength on a par with that of France, which now leads the great powers numerically with 3,739 military craft.

While this country has ranked No. 1 in naval aviation power for some time, it has been rated second or third in all-around military air strength. Differences in organization, in types and in effectiveness of aircraft together with the relative obsolescence of planes, make it almost impossible, military observers say, to determine the efficiency of the various air powers.

France Leads Numerically France's supremacy is based largely on its numerical superiority although its first line planes are of the finest type. The United States is said to be second among the "big five" in number of planes while John Bull's squadrons are rated very high because of general efficiency. Italy's aerial fleet is among the finest while Japan ranks high both in numbers and reputed effectiveness.

A comparative table compiled from the best information available shows the United States with a grand total of 2,739 military planes; Japan, 2,698; the British empire, 2,398; and Italy, 2,205. It is estimated that Russia's military planes number around 3,000, though actual statistics have not been made public.

Germany is prohibited from having military airplanes by the treaty of Versailles. Non-military aviation in that country is rated among the world's best.

U. S. Has Advantages Two highly important factors work to the advantage of the United States in building a strong air defense—the natural barriers against large scale air invasion afforded by the great expanses of the Pacific and Atlantic oceans and the potential military aviation reserve in the form of a commercial aviation far ahead of any other nation's.

The investigation committee headed by Newton D. Baker, former secretary of war, points out that military aviation in time of war must rely in large measure upon airplanes built in time of war, due to rapid obsolescence and possible heavy plane mortality. Consequently, the general condition and productive capacity of the aircraft industry are of national concern.

Uses of Planes The committee held that while the industry has not yet reached a standard of productive efficiency essential to national defense, no other power could exceed the highly industrialized United States in plane-producing capacity.

Combat strength of the army air corps is represented chiefly by three types of craft—pursuit, attack and bombardment planes. The pursuit planes are fast, espe-

MUCH INTEREST IN BOXING CARD HERE LABOR DAY

Interest continues to grow in the coming Labor Day boxing card to be staged in the Sacajawea arena at 8 o'clock Monday night, Sept. 3, and with Ernest Cavelli and Young Harry Wills, both lightweights, scheduled to meet in the 10-round main event.

Cavelli is one of the busiest lightweight scrappers in the northwest at this time, and in a comparative short time has fought most of the best boys in the division, scoring a decision over Ah Wing Lee among others. Cavelli, the blond Italian from Walla Walla, defeated Johnny Higgins and Row Oakley, and fought a draw with Frankie Monroe.

Young Harry Wills has beat about the same boys, although Cavelli once won a close decision from Wills and since then Wills has been eager for a rematch, confident he can turn the tables in their next meeting—which La Grande fans will witness.

Announcement as to preliminary and semi-final bouts will be made next week.

Sport Slants

The boys finally "pinned one" on Bill Klem, the National league's most famous umpire and they didn't miss the long-awaited opportunity to rub it in, as a consequence of President John Heydler's reversal of the arbiter's ruling on an infield fly ball and his order to replay the game, involving the Cubs and Cardinals, from the spot where the mistake occurred.

It's all because Klem is noted for his outspoken claim that he "never made a mistake in calling 'em from behind the plate or on the bases in 30 years of major league umpiring. A gruff disciplinarian, Klem has never compromised with the ball players. He is held in highest respect by one and all. But the fact that he finally "missed one" that left him no comeback has been relished in baseball circles.

In all fairness to Klem, however, it should be said that the long-standing popular notion about his attitude on making decisions has been misconstrued. Bill never meant to have the idea prevail that he didn't or couldn't make a mistake. He has often told his friends: "I may have missed some of 'em but what I mean is that there was never any doubt in my mind when I called a decision."

In other words what Klem meant and still means is that right or wrong, he calls 'em as he honestly sees 'em. That's all any arbiter can do, with only his own eyes and judgment to rely upon, and it would take the camera's eye, split to one-thousandth of a second to detect exactly what happened on any of the close ones. It's well to remember that as many as a half-dozen experienced, trustworthy judges, all on the same line, have been proved by the camera to be wrong in calling a number of foot-racing finishes.

Anyone who thinks Babe Ruth no longer worries about getting his baseballs, during the decline and imminent fall of the Great Bambino, hasn't sat with him recently in the Yankee dugout, as I did the other day, while the "Big Boy" were in town.

The Babe is that right or wrong, hasn't even been hitting .300 this year. He was squawking about getting so many bases on balls, about somebody who had been using his pet bat and about Max Bishop. "That guy robbed me of two hits yesterday and I need 'em," he remarked. "Seems to me when I catch hold of one nowadays, somebody is always in the way of it."

That afternoon the Babe belted one that looked to have the homerun ticket on it but Carl Reynolds backed up against the fence to catch the drive.

Attack planes must have good visibility as they are used in "hedge hopping" spraying enemy troops with machine gun bullets and dropping 25 pound fragmentation bombs. Often they do not fly over 200 feet high during an entire mission.

The army bomber is a powerful, multi-motored plane with large cruising radius. Equipped for night flying, it carries a pilot, a co-pilot who serves as mechanic, a bomber who also acts as a machine gunner, another machine gunner and a radio operator.

Pride of the navy air force are its "fighters," representing the maximum in performance, maneuverability and gunnery and said to be the finest naval planes of their type in the world.

After 15 years of pitching, Elmer Shea of the Stockton, Cal. State league team; this season pitched 31 scoreless innings.

ANGELS REGAIN FIRST PLACE IN WEST COAST LOOP

By The Associated Press
Hollywood's Smead Jolley and Angel Fay Thomas have returned Los Angeles to sole custody of the Coast league lead the Angels have held during most of the 1934 season. Thomas marked up his 22nd victory of the year as Los Angeles defeated Oakland 5-2, while Jolley's tenth inning double drove in the run that gave the Stars a 1-0 win over Seattle and dropped the Indians into second place a game behind the Angels.

Of no moment in the pennant fight but of great importance to Sacramento was the Senators' feat in upsetting San Francisco 3-2 to break a nine game losing streak.

In one of the season's sloppiest diamond exhibitions Portland outfumbled the Missions, seven errors to three, and was trimmed 7-4. Not one of the seven Mission runs off George Caster was earned and only one of the four Beaver scores was deserved.

CRICKET FLAT PERSONALS

Mrs. Quintilla Morris, of Imbler, and Mrs. Mary Abbot, of Elgin, spent Sunday visiting Mr. and Mrs. J. E. Witherspoon.

Mr. and Mrs. T. E. Parks drove to Wallowa Lake Sunday on a pleasure trip. Their son, Floyd, who spent the past week with the Boy Scout troupe at the lake, returned home with them.

Miss Grace Hartley, Miss Lois Witherspoon, Perry Witherspoon and Lena Tucker visited friends and were among the dinner guests at the home of Mr. and Mrs. Lynn Chadwick at Cove Sunday.

Mr. and Mrs. Leo Roulet and children, Norma Jean and Frederick, drove to Eagle Valley Thursday, returning Friday with some fruit.

Mrs. Sarah Gekeker visited Thursday at the home of Mr. and Mrs. J. E. Witherspoon.

Mrs. Mary Waely and sons, John and Arnold, drove to La Grande Sunday to attend the funeral services held for Grandma Seward.

Mr. and Mrs. W. H. Miller and Mr. and Mrs. T. E. Parks were shopping in La Grande Friday.

The traits and characteristics of boys are believed to have remained unchanged since the beginning of history.

INJECTION TREATMENT OF VARICOSE VEINS

Varicose veins may be treated either by surgical removal or by injections making use of appropriate substances.

In surgical removal the enlarged and twisted vein is first tied off at both ends and by means of a specially constructed instrument the vein is "unroofed" free underneath the skin and removed in small sections. The smaller, wandering branches of the varicose vein may require careful dissecting out with scalpel.

In the injection treatment, which may be administered either at the doctor's office or in the hospital, the skin over the area to be injected is first carefully sterilized. The solution used is then injected into the vein through a small hypodermic needle. After the injection the patient rests five or 10 minutes, a compression bandage is usually applied over the vein and the patient is then permitted to return home or to work. The treatment is usually repeated, five to 10 injections being ordinarily sufficient to obliterate all of the dilated veins.

The injection method for the treatment of varicose veins is by and large safe and satisfactory.

It must, however, be understood that not all varicose veins are alike subject to treatment, nor does each case promise permanent and satisfactory results.

Before undertaking either type of treatment for varicosities, it is important that the patient should have a thorough physical examination. Showing the patient be found to be suffering from hardening of the arteries, diabetes or any other systemic disease, it may be unwise to subject him to any form of treatment other than a palliative one.

It is also necessary to determine by several tests whether the vari-

BUS SERVICE
