### Douglas Fir May Output Increases

PORTLAND, July 5 (UP) - Lumber production in Douglas fir regions of Oregon and Washington was 626,000,000 board feet in May, according to WPB estimates.

The figure shows an increase of nearly 36,000,000 over March and was attributed to better weather.

The effect of continuing manpower and tire shortages is indicated by a comparison of May figures with those of May, 1944, which ran 41,000,000 board feet higher.

Production for the first five months of this year is 11 percent lower than that of a year ago.

Hemlock production during may was 57,000,000 board feet; spruce, 20,000,000, red cedar, 13,000,000, and all other species, 10,000,000.
