THE LA GRANDE EVENING OBSERVER WILL NEED CARRIERS AVAILABLE SEPT. FIRST

For Autumn and Winter carrying we require boys and girls of seventh and eighth grade ages and older.

We then require carriers capable of scheduling and maintaining required school work. We will need boy and girls whose homes co-operate in the supervision and direction of their time.

This requires above-average boys and girls preparing themselves for a post-war world in which they recognize there may only be opportunity for the ablest in private industry. It requires boy and girls of the sort who may earn much of their own way through college. We prefer boys and girls who, in addition to performing their school and home duties and administering an evening newspaper route successfully, recognize the advantages of the Sunday school and of scouting or other character-building organizations or programs.

We believe the finest generation of youth ever reared in America are growing into manhood today and we seek those who aspire to be leaders of that group when they reach maturity.

Stock Prices Back After Early Rally

NEW YORK, Aug. 8 (UP) — Stock prices settled back late in today's session after rallying fractions to around 2 points from the lows of the previous day.

Trading was considerably less active than on Tuesday when "peace scare" selling tumbled quotations.

The electrifying announcement of Russia's declaration of war on Japan came just as the closing gong rang on the New York stock exchange. There had been absolutely no earlier indication that such a development was in the offing.

Materials From Atomic Plants Not Identical

Work Could Go On if Either Stopped

RICHLAND, Wash., August 8 (UP) — Atomic bomb materials made here and at another hush-hush army project at Oak Ridge, Tenn., are not identical, it was disclosed today.

Production of the new, terrifying atomic weapon could continue even if for some reason this project closed up, officials said.

Col. Franklin T. Matthias, 37-year-old project director, told newsmen there is no interdependence between the Hanford plant and its counterpart at Oak Ridge.

Outside View

Maj. Joseph F. Sally, 32, project civil engineer explained, "we were betting on two horses, and they both won."

A slight relaxation in security regulations allowed reporters to get an innocuous outside view of the production area today.

Matthias also disclosed at a press conference last night that: 1-The late President Roosevelt, who knew about the project from its beginning, deliberately avoided visiting Hanford.

2-The Truman committee also avoided visiting the plant. Truman was fully informed of the project.

WPB Not In

3-The atomic material used in the test explosion in New Mexico came from here, and Matthias is "reasonably sure" material used in the bomb dropped on Hiroshima, Japan, also was a Hanford product.

4-There has been no activity identified as sabotage.

5-The financing of the project was facilitated by allowing members of the appropriations committee to see some operations.

6-Eleven persons were killed in two accidents—a train wreck and collapse of a large tank.

7-While the project could obtain an overriding priority, it was not given a triple A priority, to avoid letting the war production board in.

Superforts Arrive At Base on Okinawa

HDQTRS., EIGHTH AAF, Okinawa, Aug. 8 (UP)—Flights of Superfortresses, forerunner of about 1,000, have arrived here nearly to complete conversion of Okinawa into another gigantic B-29 base, less than a third the distance of the Marianas from the Japanese homeland.

This was announced today by Lt. Gen. James H. Doolittle, commander of the eighth air force, whose first strikes against Japan he said will be made before the end of this month.
