THE LA GRANDE EVENING OBSERVER WILL NEED CARRIERS AVAILABLE SEPT. FIRST

For Autumn and Winter carrying we require boys and girls of seventh and eighth grade ages and older.

We then require carriers capable of scheduling and maintaining required school work. We will need boy and girls whose homes co-operate in the supervision and direction of their time.

This requires above-average boys and girls preparing themselves for a post-war world in which they recognize there may only be opportunity for the ablest in private industry. It requires boy and girls of the sort who may earn much of their own way through college. We prefer boys and girls who, in addition to performing their school and home duties and administrating an evening newspaper route successfully; recognize the advantages of the Sunday school and of scouting or other character-building organizations or programs.

We believe the finest generation of youth ever reared in America are growing into manhood today and we seek those who aspire to be leaders of that group when they reach maturity.

Oregon Lamb Crop In 1945 Smallest

PORTLAND, Aug. 11 (UP)—Oregon's 1945 lamb crop is estimated to be the smallest of record since estimates were started in 1924, a department of agriculture report said today.

The smaller crop is laid to a reduction in the number of breeding ewes on hand. The current lamb crop is 12 percent below that of 1944 and 39 percent below 10-year average.

Range feed conditions were reported as below average during the fall and winter months but death losses were held to a minimum due to mild weather in the lambing period. Death losses from predatory animals have been generally less.

Sheepmen pointed out various unfavorable factors. Beginning in 1931, stock sheep were reduced 40 percent over an 11-year period and there has been further reduction from 1942 to 1945. In addition, sheepmen have held a minimum number of replacement ewe lambs in recent years with the result that the average age of breeding ewes has increased. Other factors mentioned as responsible for the decrease are high production costs.
