

Pan-American Soon To Have Globe Circling Routes

WASHINGTON, Aug. 28 (UP)—Pan American Airways soon may be carrying the United States flag on the first round-the-world commercial air route in aviation history.

Civil aeronautics board examiners recommended yesterday that the pioneer international carrier be licensed to fly westward across the central Pacific to Calcutta from San Francisco and Los Angeles.

The board recently granted Pan American certificates to fly eastward across the north Atlantic to Calcutta. If, as expected, the CAB approved the examiners' recommendation in the Pacific case, it will amend Pan American's present routes to complete "a round-the-world service by an American carrier."

The Public Pulse

To the Observer:
I have been reading for the last three days about a couple of officers who were rescued from the Japanese. They deserve honor for doing their best—honor to whom honor is due. But what of the men behind, the men who were in there fighting, who went through the death march and Jap concentration prisons? I was lucky, my boy was on the other side fighting.

But I have watched a mother's heart slowly break under the strain for four years. It would give her a new lease on life if she could hear just a line telling her that her boy was still alive, and she is only one. There are thousands of mothers and fathers waiting for just a word to comfort them. Why all the honor and glory for one or two when they were all in there fighting?

Of course there were those in the draft who had to go, but thousands volunteered.

All honor to the officers but I say God bless the men who were in there fighting. They deserve all the honor we can give them—honor to whom honor is due.

— N. Bell.
