

# Vets May Gain Benefits From Both State of Residence, U.S.

By S. BURTON HEATH  
WASHINGTON, (NEA) — The GI bill of rights promises demobilized veterans a minimum income of \$20 a week for at least a year after they leave the army, provided they are able and willing to work. It is entirely possible for this guarantee to cover a period longer than one year.

The veterans' readjustment allowance is distinct from any rights that service men may have under state unemployment compensation laws. In some states those rights, acquired before entering uniform, have lapsed; in others they were frozen and still can be claimed.

Compensation from the two sources can not be collected simultaneously.

The GI bill of rights, under title V, offers its readjustment allowance to any person who, between September 17, 1940, and the end of the present war, served actively for as much as 90 days and was discharged in any way except dishonorably. Service of less than 90 days is acceptable for persons who were discharged because of service incurred injury or disability.

Two veterans of World War II cross the bridge into civilian life as they fill out applications for mustering-out pay.

Two-Year Protection  
Unemployment is covered at any time up to two years after discharge or the end of the war, whichever is later; no allowance is made for any weeks commencing more than five years after the end of the war.

The government will pay up to \$20, and will permit the veteran to earn as much as \$3 without decreasing the allowance. If the

**A New War-Born MOTOR OIL**

now ready for cars of peace

RESEARCH FOR WAR discovered how to crack one of the toughest nuts in lubrication engineering history. Oxidation of motor oil! Oxidation attacks everything. It causes iron to rust, rubber to crack, clothing to fade. In motor oil it causes sludge—the thick sediment that forms in oil which is not only useless as a lubricant, but dangerous. Because sludge sticks to friction surfaces and prevents oil from getting in where it's needed.

So it's good news for cars of all ages that a way has been found to retard oxidation. This development of wartime research, now available to civilians, is New Golden Shell Motor Oil with oxidation inhibitor.

The inhibitor, added during manufacturing, keeps down the formation of sludge, keeps the oil rich in texture and free-flowing from one drain to the next. You owe it to your car—new or old—to protect the mileage left in it by using Golden Shell Motor Oil with oxidation inhibitor. Shell Oil Company, Incorporated.

**Like oxidized paint—oxidized oil is no good**

Paint, left exposed to the air, gets gummy, won't flow. The only oxidation inhibitor paint has is a tight-fitting lid. Motor oil in your car can't even have an air-tight lid. So to retard oxidation and its resulting evils of sludge, Shell adds a new development of wartime research—an oxidation inhibitor. Protect the mileage left in your engine by using New Golden Shell with oxidation inhibitor.
