

AIRPLANE VIEW OF THE MT. EMILY LUMBER CO.

The Mt. Emily plant covers many acres. This aerial view shows the plant, yards and pond looking from the northeast.

**OUR NEW
MANUFACTURING PLANT
IS BEING MADE READY
FOR PRODUCTION**

It comprises 18,000 square feet of new manufacturing space, equipped with the most modern machinery, for the remanufacturing of the famous Ponderosa pine lumber. Developed during the war, the plant will provide employment for many and opens up a new industrial operation.

LUMBER

WILL BE BASIC IN THE GROWTH AND PROGRESS OF AMERICA

During the war years Mt. Emily Lumber Company devoted its full facilities to military production.

Today we are producing all out for peace, producing the lumber which will be the foundation of thousands of American homes—a foundation upon which will be built a new prosperity and the attainment of new standards of living.

Lumber is the Foundation of Northeastern Oregon's Resources
