Cheese (medium cured)—To retailers: A grade cheddar single daisies, 41-51c; processed American cheese, 5-lb. loaf, 40-43c.

GUILTY

Continued From Front Page

Boys were put in a section with other youths and Collinsworth in with the men. Both Collinsworth, a telephone linesman, and the child-like-looking Stoutamire cried during the testimony but all four took the verdict without showing emotion.

The Rev. A. J. Redlick, pastor of the Bethel African Methodist Episcopal Church and past Florida president of the NAACP, said the judge and prosecutor had conducted the case in an exemplary manner.

But Florida has maintained its excellent record of not veering from the precedent that no white man has ever been executed for the rape of a Negro. Had it been the other way around, Negroes would have been given the death penalty," he said.

Jury foreman A. H. King, a wealthy Florida farmer, told United Press International that had the girl been beaten, the jury would have been inclined to inflict the death penalty.

King said the jury at no time discussed the racial question in reaching its verdict. The Rev. Daniel Speed, assistant pastor of the Bethel Baptist Negro Church, said his congregation almost unanimously was satisfied with the verdict except a few thought there should have been a death penalty.

"Today we have moved one step closer to justice," he said in his Sunday morning sermon.

The girl herself was sequestered in her home. She would not answer through her mother whether she thought the verdict was just. The mother declined to comment, too, and told reporters she was concerned about the girl who was still shaken by her experience and the ordeal on the witness stand.

PORTLAND LIVESTOCK
PORTLAND (UPI)—Cattle 1400, includes 19 loads fed steers 50 per cent cows trade uneven. Fed steers active, steady to strong, some sales 25 per cent higher, some cutter cows about steady but grass fat beef and dairy type cows being neglected. Bulls strong to 25 cents higher, loads average choice around 1100 lbs. fed steers 28.75, assorted four head at 28.50; few loads low to average choice around 1000 to 1100 lbs. 25.25 to 25.50; good steers mostly 27.50 to 28.75; standard 26 to 27; canner and cutter cows largely 14 to 16; heavy cutters to 17; light canners and fat dairy type cows down to 12; utility bulls 24 to 25.50. Calves: 225; demand very narrow; only scattered sales good weaners fully 1.00 lower at 27 to 28; odd good and choice stock calves 27 to 30. Hogs 1750; trade moderately active, steady; U.S. No. 1 and 2 butchers 190 to 225 lbs., 18.75 to 19; mixed 1, 2 and 3 lots 180 to 240 lbs. 18 to 18.50; few 300 to 375 lb. sows 13.50 to 15.50; 400 to 550 lbs. 11-13. Sheep: 2250; slaughter spring lambs mostly 25 cents higher; feeders fully steady; around 500 head mostly choice 81 lbs. Washington range spring lambs 23.75; predominantly choice 85 to 105 lbs. 22.50 to 22.75; few 23; good and choice around 65 to 85 lbs. feeder lambs 17.50 to 18.25; cull to good slaughter ewes 2.50 to 3.

N. Y. STOCKS

NEW YORK (UPI)—Late strength in railroad shares helped restore some of the losses registered in the stock market in the early trading today, losses that ranged from 1 to more than 2 points.

Rails registered advances of fractions to a point at a time when wheat helistw as soft. The rise brought a turn elsewhere, notably in the auto, steel and oil sections.

Plywood stocks fell on lower prices for their product and a dip in housing starts. Coppers fell 1 to more than 2 points on lower prices for the metal abroad.

American Telephone stood out in volume and met some support after touching a new low at 77 1/2 off 1 1/2 points. Boeing Aircraft was active and also hit a new low from which it met moderate support.

Several of the oils reflected improved demand with gains of nearly a point in Atlantic Refining and of nearly 2 points in Texas Gulf producing. Amerada lost more than a point.

Domestic corporate bonds de-

Scientists Lack The Funds To Develop Space System

AZUSA, Calif. (UPI)—Scientists of Aerojet-General Corp. say that if they had three to five years and enough money they could develop a system capable of driving man into deep space at astronomical speeds eventually reaching three million miles per hour.

But once into space, Dr. Y. C. Lee said Saturday he was confident the electrical propulsion system he has been studying for a

French Delay Liz And Eddie

LONDON (UPI)—The passport said "Mrs. Mike Todd" but she kept insisting she was really Mrs. Eddie Fisher so French immigration authorities delayed Elizabeth Taylor at a Paris airport Sunday night.

There was no flicker of recognition when Liz and her new husband, Eddie, approached the immigration authorities in readiness to board an airliner for London. And they didn't have their marriage license with them which added to the delay.

It looked as if their Italian airliner would have to leave without them for a while. But finally police decided to take Liz's word for it that she wasn't a smuggler or border jumper.

Perkins Infant Taken By Death

Walter Raymond Perkins r. of Tacoma, Wash., died at the age of seven months in the Madigan Army Hospital, June 13.

The funeral services will be held Wednesday, June 17 at 2 p.m. in the Summerville Chapel, arrangements by Dempsey Snodgrass Chapel. Mrs. Mable Shaffer will officiate. Burial will be in the Summerville Cemetery.

He was born in La Grande on Nov. 7, 1958.

Surviving are his parents, Mr. and Mrs. Walter R. Perkins of Tacoma, Wash.; two sisters Nancy Jean and Larura Eva; grandparents Mr. and Mrs. W. W. Perkins of Milton Freewater, and Mr. and Mrs. D. W. McBride of Imbler.

clined on moderate activity. U.S. government bonds were quoted 1-16 1/2 point lower in quiet over-the-counter dealings.

On the American Exchange, prices were irregularly lower, trading moderate.

year would give spacemen mobility to journey to the planets.

The physicist calls it the "charged colloidal propulsion system." It is composed of a nuclear factor which produces electricity which, in turn, charges a cheap, undisclosed "fuel."

What happens, according to Lee, is this:

The electricity creates a flow of molecules grouped together like grapes. The groups generate a thrust of about 10 pounds—microscopic compared to the amount of power needed to get into space. But those 10 pounds are enough in a weightless vacuum where a push by a little finger would send man moving through space.

Lee said his system would thrust a rocket ship 3.2 miles a second. If that is multiplied by the 60 seconds in a minute, by the 60 minutes in an hour, by the 24 hours in a day and by the number of days in the voyage, the speed becomes fantastic, he said.

The scientists said Aerojet, his employer for more than 10 years, has used funds of the Advanced Research Projects Agency in preliminary study of the system.

Now, he said, is the time for the government to look at the system and decide on a future course.

Wilson Addresses Oregon Graduates

EUGENE (UPI)—Dr. O. Meredith Wilson, president of the University of Oregon, told 1,496 graduates who received degrees here Sunday afternoon in 82nd annual commencement exercises to carry on a "courageous, even audacious exploration of the jungle of moral, political and diplomatic confusion that surrounds us."

Dr. Wilson told the graduates that their discontents were wholesome but "confident self-respect must be joined with discontent and resignation must be replaced by determined action. To be a beatnik requires only that you resign yourself to live in the hopeless state we have prepared for you. To be a man requires much more of you."

Sunday's Hayward Field ceremonies were the last of four separate ceremonies here and in Portland in which a total of 1,722 undergraduate and graduate students received degrees.

The \$1,000 annual Ersted award for distinguished teaching went to Dr. Bernd Crasemann, associate physics professor who has been with the Oregon faculty for six years.
