### Answers Your Problems

Dear Ann: Our six-year-old son has a habit of taking things from neighbors. He gets into their homes under the pretext of using the bathroom, then helps himself to small objects. He shows me (rather proudly) what he took and tells me where he got it.

I always insist he go back to the house and leave the stolen object somewhere.

I've tried to explain he shouldn't take things but he seems to be getting worse instead of better. What shall I do?—Worried Mother.

Dear Mother: You are fostering this boy's thievery by making a game of it. The next time he steals something make him take it back and hand it to the woman with his apologies. And go with him to make sure he does it just this way.

Many youngsters go through the light-fingered stage. With proper parental guidance they normally stop as they get older.

It's a form of collusion when you permit the boy to sneak the stolen object back into the home. He can't see the difference between sneaking it out and sneaking it in. This could become a dangerous practice and I hope you'll put an end to it at once.

Dear Ann: My wife says I'm a case for a psychiatrist. Before I head for the couch I'd like your opinion.
