

COLLISION DAMAGE—The passenger liner, Israel, shows a gaping hole in its port side as it enters the Todd Shipyard, Brooklyn, N. Y., for repairs. The damage occurred when the Israel collided with the U. S. Lines freighter, American Press, near the Statue of Liberty. One crewman of the Israel was reported missing.

### Cub Pack 112 Said Largest In Eastern Oregon History

Cub Scout pack 112 of the Blue Mountain Council is now the largest pack in Cub scouting history in Eastern Oregon, according to Paul Jenkins, scout executive for the council. The pack was increased with 40 new cubs and parents at recent ceremonies in La Grande. Inducted into the pack were the following: Mr. and Mrs. Harry Harris and son, Stephen; Mrs. Kathleen Beickel and son, Mike; Mr. and Mrs. Don Dolven and son, Mike; Mr. and Mrs. Burl Courtney and son, Larry; Mr. and Mrs. Don Farman and son, Peter; Mr. and Mrs. John Corriell and son, Scott; Mrs. Evelyn Swart and son, David; Mr. and Mrs. Alan Hall and son, Michael; Mr. and Mrs. James Kearns and son, Billy; Mr. and Mrs. Charles Reynolds and son, Jimmy; Mr. and Mrs. Harold Beaver and son, Terry; Mr. and Mrs. Ken Lilly and son, Andy; Mr. and Mrs. Wayne Barton and son, John; Mr. and Mrs. Verne Pridden and son, Patrick; Mr. and Mrs. Jerald Shields and son, Charles; Mr. and Mrs. Bob Barnes and son, Robert; Mr. and Mrs. Dave Brizeline and son, Danny; Mr. and Mrs. Bill Winn and son, James; Mr. and Mrs. Lee Moser and son, Denis; Mr. and Mrs. Del Jones and son, Rodney; Mr. and Mrs. Dock Baker and son, Bruce; Mr. and Mrs. Melvin Randolph and son, Michael; Mr. and Mrs. Stan Weishaar and son, Steve; Mr. and Mrs. Jim Voelz and son, Jim; Mrs. Elinore Denny and son, Jeffrey; Mr. and Mrs. Jim Malonado and son, Jeffrey; Mr. and Mrs. Marshall Collins and son, Alan; Mr. and Mrs. Frank Rohan and son, Don; Mrs. Matilda Tsai and son, Mark; Mr. and Mrs. John Turner and son, Timmy; Mr. and Mrs. Bud Jones and son, Brian; Mr. and Mrs. J. T. Hagarty and son, Michael; Mr. and Mrs. A. L. Bryan and son, Edward; Mr. and Mrs. Gordon Clarke and son, Robert; Mr. and Mrs. Tom Nichols and son, Doug; Mr. and Mrs. Kirk Brown and son, Kirk; Mr. and Mrs. Leonard Spears and son, Doug; Mr. and Mrs. Lee McLaughlin and son, David; and Mr. and Mrs. James Surlingame and son, Garry. Ed Craig, La Grande, is the cub master.

### Every Space Man Should Have A Dog

WASHINGTON (UPI) — Scientists said today that every space man should have a space dog as companion and life-saver. This proposal was made at the annual meeting of the American Rocket Society by Dr. Leslie Kaeburn of Spacelabs, Inc., Van Nuys, Calif. The dog, Kaeburn said, would serve as a "space canary" to warn of danger if it should develop aboard the spacecraft. "Just as coal miners once took canaries along with them as a safety measure to see if the air underground was fit to breathe, the astronaut should be accompanied by an animal instrumented to warn him or a ground observer if his physiological condition becomes abnormal," Kaeburn said. He added that a dog would be an astronaut's best friend in other ways, too, providing him with companionship and comfort in the lonely reaches of space. Instruments with tiny radio transmitters would be implanted surgically in the dog to report on the state of his heart, nervous system, brain, lungs, blood pressure and temperature. Spacelabs scientists said they had successfully implanted a two-ounce radio, three-inches long and three-eighths of an inch wide, in a dog to report its heart action. The dog, a 1 1/2-year-old male beagle named Orbit, now regularly sends electrocardiograms which can be received over considerable distances. He has suffered "no ill effects," Spacelabs said.

### Five Youths Die In Wreck

LONGVIEW, Wash. (UPI) — A car plunged over a 35 to 40-foot embankment into the Mount Solo slough Monday night killing five teenage boys. One youth escaped. The dead, all from Longview, were Jerry Walston, 15, and his brother Floyd, 13; Bill Webster, 16, and his brother Dick, 13; and the driver, Douglas Rudolph, 17. Francis Hughes, 16, was the only survivor. The sheriff's office said the car was traveling at a high rate of speed when it plunged over the steep embankment into about 20 feet of water. Hughes was able to swim to shore. The others were trapped in the wreckage.

### Mrs. Otten Heads Cancer Study Here

Mrs. Fred Otten of La Grande will serve as Union County chairman of the Cancer Prevention Study for the American Cancer Society, Oregon Division. The local chairman will be in charge of selecting group leaders. Each of these workers, in turn, will enroll and train about 10 volunteer researchers. The researchers will contact 10 families who will answer the confidential questionnaires.

## Simple Device Invented Is Boon To Gasoline-Operated Engines

STANFORD, Calif. (UPI) — A 67-year-old inventor displayed a fairly simple device today which enabled a standard V-eight auto engine to: —Run just as well on kerosene, alcohol or diesel fuel as it did on high-octane gasoline. —Operate on 15 per cent less fuel than an ordinary engine. —Produce two-thirds less smog ingredients in its exhaust. —Cut down exhaust production of carbon monoxide to a point where it would be impossible to commit suicide in a converted car. The invention, known as the "RAM Straticube Combustion System," was developed by Jack Heintz in the garage of his home at Los Gatos, Calif. It was tested and is on display at the Stanford University engineering laboratory. Heintz, former partner in the Jack and Heintz engineering firm of Detroit, said the modification could be applied to any auto engine for about \$200—and could be built into new engines at no increase in their cost. **No Industry Offers** The inventor said he hasn't been approached by the automobile industry in regard to the device and doesn't expect to be. "They're content with the status quo and more interested in covering up the deficiencies of their engines with smog-muffler systems than in improving their fuel burning potentials," he said. Heintz said the auto industry's experiments with mufflers which would destroy unburned fuel after it leaves the engine by heat or catalytic action was "like inventing rubber gloves to repair a leaking fountain pen." Professor A. Louis London, who supervised the tests in the laboratory here, said the only apparent drawbacks were "a somewhat noisier engine" and "some sacrifice in maximum power." He said, however, that he believed the auto industry could cut the noise and boost the power if it tried. The key part of the test engine is the combustion chamber. Combustion takes place in two interconnected chambers—a small "pre-combustion" chamber that fits into the spark plug well, and in the main firing chamber. The small chamber has a separate inlet valve. **Fuel-Air Ratio "Lean"** The system pumps fuel and air into the small chamber for light and medium loads and into both chambers for heavier loads. The ratio of fuel to air is extremely "lean" as in diesel engines and in contrast to the "fuel-rich" mixture of most gasoline engines. A spark plug ignites the mixture in the smaller chamber, from which it explodes into the larger one. The result is over-all diesel-like combustion, more complete than ordinary combustion. In tests simulating normal driving, unburned hydrocarbons in the exhaust—the elements that produce smog—were less than two per cent of the fuel, compared with five per cent for ordinary engines. The wealthy and now retired inventor developed the device as a hobby and seemed unconcerned whether or not it was taken over by a manufacturer. Heintz said two large companies were interested, but he refused to name them. He said a third company, Food Machinery Corporation, was testing the system in army tanks—for its cheap fuel rather than its anti-smog potential.

## Kennedy Asks Price-Control Program For Dairy Producers

WASHINGTON (UPI) — Sen. John F. Kennedy (D-Mass.), a Democratic presidential hopeful, has called for a self-governing price-control system for dairy producers. In outlining parts of his basic farm program before the National Milk Producers Federation Convention Monday night, Kennedy also urged wider use of surplus foods at home and abroad. **Farm News Roundup** WASHINGTON (UPI) — Sen. John F. Kennedy (D-Mass.), a Democratic presidential hopeful, has called for a self-governing price-control system for dairy producers. **Forecasters Predict** Farm forecaster predicted today that the long rise in farm assets might come to a halt in 1960 or 1961. A new credit and finance report showed that farm assets and equities rose in 1959. But the increase was only about 2 1/2 per cent, the smallest rise since 1955. The report said the steady rise in farm land values was expected to slacken or stop in the next year or so. The report also said declines in cattle prices could reduce the value of the national cattle inventory. **Washington (UPI) —** Farm production expenses will hit an all-time high of about 21 billion dollars this year and are likely to go higher in 1960, an Agriculture Department report predicted today. The expected increase, combined with a further drop in farm prices, would tighten the cost-price squeeze on U. S. farmers. In a break-down of expenses, the department said taxes and interest paid by farmers in 1960 would be at least as high as this year and perhaps higher. The same would be true for depreciation charges and for most industrial goods purchased by farmers, it said. **Washington (UPI) —** The Agriculture Department said today the surplus carryover of soybeans may be cut in half during the current marketing year. On Oct. 1, when the marketing year began, supplies of soybeans from 1958 and earlier crops totaled a record 82 million bushels. By Oct. 1, 1961, the department expects the carryover to be down to about 35 million bushels.

**ICE SALT DAMAGING** CHICAGO (UPI) — Corrosion damage because of salt spread to thaw snow and ice on highways will cost the nation's auto owners about 10 million dollars this winter, the Rust-Oleum Corp. predicted today. De-icer salt has been the major cause of rust damage, and is especially hard on chrome, mufflers and tail pipes, the company said. **Washington (UPI) —** The Agriculture Department said today the surplus carryover of soybeans may be cut in half during the current marketing year. On Oct. 1, when the marketing year began, supplies of soybeans from 1958 and earlier crops totaled a record 82 million bushels. By Oct. 1, 1961, the department expects the carryover to be down to about 35 million bushels.

STARS IN THEIR EYES—Doris Day appears fascinated by Rock Hudson in this scene from the Universal-International release, "Pillow Talk." The top film, in color and CinemaScope, opens at the Granada Theatre here Wednesday.

## North Powder People Given Pins At 4-H Leaders' Banquet

NORTH POWDER (Special) — Several people from North Powder recently received pins at the Union County 4-H Leaders Banquet at Island City. Those receiving pins for leadership were: Mrs. Gordon Griffith, eight year pin; Mrs. Charles Isaac, three year pin; and Mrs. Jake Flowers, three year pin. Those receiving pins for junior 4-H leadership were: Kay Griffith, three year pin; Judy Isaac and Kay Flowers, each a three year pin. The banquet was sponsored by the Farm Bureau. Mr. and Mrs. Bud Essey of Portland have visited at the Ernest Simons home. The Esseys were on their way home after a trip to Idaho. Several men around the vicinity have been lucky enough to get elk. Fred Christman, Gerald Crawford and Ed Taylor got their elk at the first of the season. **Telescope Visitors** Mr. and Mrs. Virgil Magner and three sons, Gary, Larry and Terry, of Pendleton, visited at the Simons home in Telescot recently. Magner is a prominent dairyman in Pendleton. The regular Telescot Pinchle party was held at the Mike Asper home. Mrs. Emma Whitlock served refreshments. The men of Telescot got together recently to play cards while Mrs. Eloise Simons, Mrs. Lucille Evans, Mrs. Juanita Wilson, and Mrs. Emma Whitlock traveled to Powder to take the Telescot children visiting. After the women and children returned to Telescot, they all met at the schoolhouse for a party. Kenneth and Jimmie Niece of La Grande were recent visitors of their grandparents, Mr. and Mrs. Harry Niece. Malcolm and Donald Niece recently helped Ted Arnoldus saw wood. He was slightly injured while sawing. Frank Gulick sold some cattle recently. **Ministers Guests** Ministers Dorothy Ioezger and Will Dahlin were dinner guests of Mr. and Mrs. Ernest Simons. While here, the two visited at the Henry McClure home. Clarence Wicks, Hot Lake, has been taken to the St. Joseph hospital in La Grande for medical treatment. Harry Niece visited Mr. and Mrs. John Niece recently. Mrs. Gary Erwin and daughter, Lori, and the two Osterloh children, Russell and Douglas, spent the afternoon recently with her mother, Mrs. Fred Jordan, Union. Vernon Simons, Portland, visited several days ago with his parents, Mr. and Mrs. Ernest Simons. Mrs. Meila Rogerson, Baker, spent one day recently with her niece, Mrs. Keith Simons. A guidance session covering preparation for college or other training beyond the high school level was held for the Powder Valley juniors and seniors recently. Mr. Vancil, high school principal, introduced the speakers from the different schools at the meeting. They were Mr. Lutz of U. of O.; Mr. McVey of O.T.I.; and Lyle Johnson of E.O.C. These men explained their respective academic offerings and pointed up each institution's specific requirements. Opportunity for questions by students was given to provide individual guidance. The importance of education beyond high school and the urgency

## Reuther Blamed In Steel Strike

WASHINGTON (UPI) — Sen. Barry Goldwater (D-Ariz.) charged today that United Auto Workers' (UAW) President Walter Reuther is using the dues and initiation fees of UAW members "to keep hundreds of thousands of those same members out of work." Goldwater said in a statement that is the "practical effect" of a one million dollars gift from the United Auto Workers' treasury to the United Steelworkers. Goldwater said the gift is designed "to keep the steel strike going." The senator said he doubts whether the gift reflects the wishes of the automobile workers "in view of the fact that the steel strike has thrown thousands of auto workers out of work."
