## Juvenile Dog Delinquent On Way Back To Normal Canine

LONDON (UPI)—Butch is on the road back.

The four-year-old boxer who became a juvenile dog delinquent because of an unhappy puppyhood showed every sign today of responding to psychiatric treatment and returning to a normal dog's life.

Dog psychiatrist Robert Horsfall was overjoyed at Butch's behavior the first day of treatment and predicted his inferiority complex would vanish as he learned that all dogs don't bite.

Horsfall almost shuddered as he recounted the misadventures that started Butch off on a life of fear and mistrust that led to a well-developed persecution complex.

**Mongrel Bites Butch**

"As a puppy he went up to a black mongrel on Shoreham Seafront, furiously wagging his tail, and was promptly bitten," Horsfall said.

"Two months later he was bitten in the leg by a golden retriever. Shortly after, the black mongrel chased him into his garden and tore his throat."

"Ever since he has either cowered from other dogs or attacked them. But we can cure him."

**Trained Queen's Dogs**

A court ruled Butch must have psychiatric treatment or be destroyed so his owner, Mrs. Con-

stance Gamble, brought him to Horsfall who trained Queen Elizabeth's well-behaved corgis.

Horsfall is using a sort of build-up system of the morient. Tuesday Butch, on a leash, was introduced to a cairn terrier, the kind he bit the last time he saw one.

There were no snarls, to barks though he wrinkled his nose in distaste.

Later, as Butch learns that other dogs can be fun, he will be introduced to more and more. Finally he will be allowed to train with them without a leash. Horsfall predicts full acceptance. He also says it really isn't Butch's fault at all.

"Just let me say that us human beings are at fault," he said. "The world is nuts and we're making the dogs nuts, too."

## Jupiter Makes 18th Successful Test Shot

CAPE CANAVERAL, Fla. (UPI)—The workhorse Jupiter IRBM rumbled over the Atlantic to its 18th test flight success Wednesday night, enhancing its role as a three-in-one military and space missile.

The Army Ballistic Missile Agency, which developed the Jupiter as the first completely successfully-launched U. S. IRBM, 2½ years ago, said Wednesday night's shot was programmed for "less than maximum range" of about 1,700 miles.
