HOW OLD IS IT?

SCIENTISTS CAN DETERMINE THE APPROXIMATE AGE OF AN OBJECT IF IT CONTAINS A RADIOACTIVE SUBSTANCE SUCH AS URANIUM AND CARBON-14.

THIS IS MADE POSSIBLE BY THE FACT THAT RADIOACTIVE DECREASES AT A KNOWN RATE OVER A PERIOD OF TIME.

THIS BY MEASURING THE RADIOACTIVE ACTIVITY OF SEVERAL OF THE EARTH'S ROCKS SCIENTISTS HAVE CALCULATED THE AGE OF THE EARTH AS ABOUT 4.5 BILLION YEARS.

BY MEASURING THE RADIOACTIVITY OF THE CARBON-14 IN THE DEAD SEA SCROLLS IT HAS BEEN ESTABLISHED BY SCIENTISTS THAT THEY ARE AT LEAST 1000 YEARS OLD WHICH SUPPORTS THE BELIEF OF HISTORIANS AS TO WHEN THE SCROLLS WERE WRITTEN.

Red Scientists Deny 4 Humans Lost In Space

MOSCOW (UPI)—Reports from Italy that four Russians have been lost in space flight have been ridiculed by informed sources here.
 An Italian news agency reported Saturday that a woman and three men had perished in space bids over the past two years in Russia. It quoted "most reliable sources" in Prague.
 The agency said a leading Soviet test pilot and two other men were sent up in rockets. The Russian woman was said to have died in a space aircraft similar to the American X15, which is still undergoing tests in the United States.
 But sources here said the reports were erroneous and that Russia plans many more experiments with animals before contemplating a man into space.
