

**TOUHY'S COMPANION SHOT**—Walter Miller, a retired policeman and companion of Roger Touhy is carried from the scene of the Chicago gangland shooting in which Touhy was killed. Miller, who managed to fire three shots at the assailants before collapsing, is now in critical condition.

**BUSH SURRENDERS** — Jimmy Bush, 44, allegedly robbed the bank Dec. 11 while on a selling trip through Ohio for a matchbook advertisement in Warren, Ohio, surrendered to the FBI here Friday.

## Expect Farm Output To Set New Record Highs This Year

WASHINGTON (UPI) — Farm output, including crops and livestock, will set a record this year but farm income has declined 15 per cent.

The Agriculture Department's crop reporting board, in its final production estimates of the year, said crop production equaled the all-time high set in 1958. But total farm output was expected to top last year's by 2 per cent because of higher livestock production.

The board's all-crop index stood at 18 per cent above the 1947-49 base, the same as last year's record.

The board said yesterday that production of wheat and several other crops, such as soy beans and oats, slipped this year below 1959, but corn and cotton helped make up the difference.

Total production of food grains was about one-fifth below last year's record. But feed grain tonnage, bolstered by a record crop, reached a new high of 165,600,000 tons, 3 per cent above the former record set in 1958.

The corn crop itself was 15 per cent above the record set last

year. The department's final estimate put corn production at 1,361,170,000 bushels.

The wheat crop was estimated at 1,126,181,000 bushels.

The final corn crop estimate compares with last month's forecast of 4,402,470,000 bushels, last year's revised total of 3,800,863,000 bushels, and the 1948-57 average production of 3,251,064,000 bushels.

The final wheat estimate, made up of 923,449,000 bushels of winter wheat and 204,732,000 bushels of spring wheat, compares with November estimates of 1,117,430,000 bushel crop — 909,233,000 bushels of winter wheat and 208,197,000 bushels of spring wheat.

WASHINGTON (UPI) — The Agriculture Department has finished its current best buying program with the purchase of 2,562,899 pounds of the meat.

Altogether, the government has bought 24,318,000 pounds of frozen ground beef in recent weeks for \$9,856,000.

The department announced Wednesday the purchase of 2,544,730 pounds of canned pork and beef for school lunchrooms.

This brought purchases of that product in recent weeks to 23,450,250 pounds at a cost of \$11,407,500. The pork buying will continue, the department said.

WASHINGTON (UPI) — Agriculture Department researchers say it may soon be possible to pay soybean farmers on the basis

of the oil content of their beans.

A new electronic device is being perfected which can measure the oil content of beans in a test which takes only 15 minutes. In comparison, laboratory tests require eight hours.

Officials said the device already has been tested commercially and is reasonably successful. However, they said it needed some further improvement before it would be ready for general use.

**EXPERTS IN BGDHAD**

MOSCOW (UPI) — A delegation of Soviet building experts was arriving in Baghdad to aid the Iraqi government in the construction of industrial enterprises. Tass news agency reported Friday.

United Fund workers will complete their canvass of local firms this week, Dave Baum, drive chairman, has announced.

A total of \$21,800 had been collected by Friday and additional money was coming in, Baum said.

He urged residents to contribute to the fund which aids charitable organizations in this area and elsewhere in the state.

Goal for the current drive is \$21,500.
