NEW YORK STOCKS
NEW YORK (UPI) — Stocks advanced irregularly today in moderate trading.
Electronics encountered some heavy selling. Chemicals were firm, steels dull and rails and oils fractionally higher.
Ampex continued to react to the report that General Electric is coming out with a new process for recording and producing sound, sight and coded electrical impulses. It lost more than 11 Thursday and more than 6 in early trading today.
The new GE process, called thermoplastic recording, is described as being related, yet competitive with magnetic tape, a field in which Ampex plays a major role.
