**Wynonna Earp gives supernatural adventure**

The first two seasons of "Wynonna Earp" gave title star Melanie Scrofano a wild ride, and she's holding on eagerly as Season 3 begins.

The comic-book-inspired Syfy merging of Western traditions and the supernatural returns Friday, July 20 (with a "sneak peek" Monday, July 16). Scrofano continues as legendary lawman

Wyatt Earp's great-great-granddaughter, whose relationship with the now-eternal Doc Holliday (Tim Rozon) has produced a child - but one from whom Wynonna is separated, for daughter Alice's safety. The plot has great resonance for Scrofano, now a parent herself: she filmed Season 2 while pregnant.

"Once you become a mother, you sort of see everything through those eyes," the friendly actress confirms. "At the end of Season 2, Wynonna was reunited with her mother (now played by veteran talent Megan Follows) ... and once you become a parent, you are equal to your own parent. You're on the same level as human beings, so it opens a whole other dimension for being in this world."

With singer-songwriter Jann Arden ("Inesentive") also joining the cast, the Emily Andras-developed "Wynonna Earp" has gotten high marks for its inclusiveness, encompassing the same-sex relationship of Wynonna's sister Waverly (Dominique Provost-Chalkley).

"Nobody ever said, 'OK, here's who we're going to go after,'" Scrofano reflects. "We were just making a show about this world and these people, but I think what it really comes down to is that it feels fresh. You might find it a Western, or you might find it supernatural, or you might find the other elements elsewhere - but you don't find them together, and there's something very refreshing about that. I think. It's like when a new musician comes on the scene. It's something you never knew you wanted because
