tonight's best

Emily Graslie

6 p.m. on COOK Man Fire Food

Host Roger Mooking heads to the Aloha State, where chef Lee Anne Wong ("Top Chef") fires up a custom-made stainless-steel shelving unit with local kiawe wood and prepares a tropical feast in the new episode "Hawaiian Heat and Texas Meat." On her menu are juicy beer-can chicken, slow-roasted fruits and vegetables and fresh mahi-mahi fillets wrapped in banana leaves. Later, in Bellaire, Texas, Mooking stops at Blood Bros. BBQ, where brothers Robin and Terry Wong cook up creative barbecue with their childhood pal Quy Hoang.

7 p.m. on TRAV Bigfoot is Real

Bobby Hamilton and Jim Lansdale, founders of the Gulf Coast Bigfoot Research Organization (GCBRO), lead a team of "commandos" on a mission to find and kill a Bigfoot, to offer scientific evidence of the creatures' existence as well as to protect the public from any future attacks in this new series. In the premiere, "Giant Swamp Creature," the team investigates a Bigfoot encounter on a farm near the Sabine River, where they run into a former teammate who now is a Bigfoot no-kill advocate.

9 p.m. on FOOD Guy's Grocery Games

In the new "Like Father, Like Chef," a Father's Day-themed episode, Guy Fieri welcomes three father-child teams to play games that start with using an oversized "World's Greatest Dad" mug to shop for the father's fried favorite. Next, a round of Flavortown golf determines which key ingredient they must feature in their steakhouse dinner. Judges Mark Anderson, Maneet Chauhan, Ryan Fey and Christian Petroni decide which father-kid chef duo wins a shopping spree worth up to \$20,000.

10 p.m. on PBS Prehistoric Road Trip

YouTube science communicator Emily Graslie hosts this three-episode documentary miniseries, which follows her as she embarks on an epic road trip through the "fossil country" of America, where she encounters some of the mysterious creatures and bizarre ecosystems that have shaped Earth as we know it over the eons. Her exploration of the American West from both above and below yields a better understanding of our planet's past, as well as how new discoveries may affect the future.
