

Couple clashes over time spent with their sons

DEAR ABBY: My wife and I have been married five years and are raising four children. One is from my previous relationship, one is from her previous relationship and two are ours. We both have joint custody. My son goes to school near his mom. My wife's son goes to school where we live. They are 9 and 8.

DEAR ABBY

There's a lot of tension between us because my stepson's father isn't the greatest parent. He never comes to school events or sporting events, so he misses half of everything. I regularly attend my son's events, which are a couple of hours away and take time away from my stepson. I put my 9-year-old first because he's my firstborn, and I have him less. My wife disagrees with this, and we fight about it constantly. I believe I am doing the right thing. Advice, please.

— WONDERING IN WISCONSIN

DEAR WONDERING: I'm sorry your wife's son's father hasn't stepped up to the plate. But please do not allow your wife to interfere with your relationship with your son. You ARE doing the right thing by showing an interest in what he's doing and supporting him emotionally.

DEAR ABBY: I have been married nine years. My husband doesn't allow me to leave the house without him. He makes sure I don't have a car or access to the one we have. He tells me he doesn't mean anything by it, but if I try to take a walk alone, he is right on my heels.

If I go anywhere with my sister or a friend, I must wait until he is gone. If he gets home before I do, he's sitting on the porch waiting for me. He is not physically abusive, but I feel like a prisoner. I have told him several times how it makes me feel, but he doesn't seem to get it. I really need some advice.

— TRAPPED IN GEORGIA

DEAR TRAPPED: Your husband doesn't get it because he doesn't WANT to. What he is doing is NOT a demonstration of love or concern for your safety. It's an example of his own insecurity and need to control you. This is a big red flag, and my advice is to call the National Domestic Violence Hotline and discuss this with someone there because what's happening could escalate into abuse. The toll-free phone number is: 800-799-7233.

DEAR ABBY: I love my grown children and grandchildren, but I hate it when they come "home" for a week or more. My house gets turned upside down and inside out, and I end up losing my temper. Then I feel like an awful mother. I suggested we all meet somewhere else, but it didn't go over well. Help!

— INVADED IN NORTH DAKOTA

DEAR INVADED: Your suggestion may not have gone over well with your children and grandchildren, but that doesn't mean you shouldn't "suggest" it again. And when you do, make sure they understand you are saying it because when they visit they leave your home in disarray, which creates more work for you than you are comfortable doing. Unless they are willing to make sure your home is as neat when they leave as when they arrived, enough is enough.

EMPTY

Continued from Page 1B

That's an area bigger than the five smallest states combined — Rhode Island, Delaware, Connecticut, Hawaii and New Jersey.

Yet the total population of the three southeast counties is just 47,470, less than half the number of people who live in Bend alone.

But even that comparison is somewhat misleading. The three-county population, meager though it is, in one sense greatly exaggerates the region's population density. Of the 47,470 residents, almost half — 23,430 — live in one of just six towns: Ontario, Nyssa, Burns, Lakeview, Vale and Hines. Outside those cities the population density throughout the three counties is below one person per square mile — 640 acres.

Suffice it to say that if you venture away from one of the few highways or other paved roads, the only traffic congestion you're likely to encounter is a herd of cattle, deer or pronghorn.

(And the pronghorn, like as not, will be running far faster than you can safely, or comfortably, travel in a rig, what with the typical condition of the backroads in an area where pavement is as rare as rimrock in a metropolitan downtown.)

One of the bigger bare stretches on the map is also one I had been hankering to revisit since I first ventured there with my dad about 20 years ago.

This is the area west of Owyhee Reservoir and south of Highway 20.

To put into perspective the scale of this region, from Vale, the nearest paved road to the south — Highway 95 at Jordan Valley — is about 75 miles away.

To the southwest, Highway 78 — which runs from Burns to Burns Junction, where it meets Highway 95 — is about 60 miles, with not a single settlement between.

This is not a place to have a flat tire and no spare.

A place where the whine of a starter that fails to get the engine running is perhaps the most frightening sound imaginable.

A place, perhaps most importantly, where a nearly full tank of gas is the best sort of insurance.

This region is probably best known, at least in the past few decades, for the interest that multiple mining com-

panies have shown in the microscopic, but extensive, gold deposits around Grassy Mountain, about 22 miles south of Vale.

Paramount Nevada is the firm currently working on a proposal to extract the precious metal.

Until the heavy equipment arrives, though, the area is fantastically lonely.

As is the case with most of Oregon's southeast corner, the Owyhee country is primarily sagebrush steppe, the famous high desert in the rain shadow that the Cascade Mountains cast across much of Oregon.

But it is hardly the featureless, monotonous landscape that the scarcity of words on large-scale maps, such as an Oregon highway map, implies.

Once you leave the irrigated valley of the Malheur River near Vale, the Twin Springs road climbs ridges, dips into dry gulches and passes rimrock outcrops and water-sculpted badlands. Geologically speaking this is volcanic country, the rocks predominantly basalt and rhyolite, with layers of volcanic ash in places.

The lone oasis in the approximately 37 miles south of Highway 20 is Twin Springs campground. Formerly a homestead, the property was returned to public ownership in 1963.

The road was in relatively good shape when we drove it on April 3, the berms left by the grader's recent passage still looking fresh. But that changes a few miles south of Twin Springs, as the road descends into a gulch that leads to Dry Creek. The stretches of steep, boulder-strewn road are

best-suited for a high-clearance four-wheel drive vehicle.

I was drawn to Dry Creek not only because so many years had passed since I went this way, but also because I had only recently realized that one of Oregon's most unusual enclaves of vacation cabins is nearby.

When my dad and I were here we drove just a short distance along the Dry Creek Road, dissuaded, as near as I can recall, by the boulders and by the uncertainty that we would actually reach the reservoir.

But a while back I happened to be gliding over Owyhee Reservoir, courtesy of Google Earth, when I noticed a cluster of structures on the south shore of the reservoir's Dry Creek arm, one of its longest coves.

This piqued my curiosity, and prompted our April 3 trip.

We parked just before the Dry Creek ford, not because the crossing posed any challenge but because we wanted to get in a hike.

(The stream, despite its desert-appropriate name, carries a significant volume of water in early spring, swollen, I'm sure, by snowmelt.)

That day before Easter was the warmest so far, the temperature in the mid 70s, and I was reminded that midsummer is an unpleasant, and potentially dangerous, time to travel through this remote country.

It's only a mile or so to the reservoir, even in its depleted condition — a little more than half full on the day we visited.

There are a dozen or so cabins, in various sizes and types of construction, on the shore. I had learned that these

If You Go ...

From the west end of Vale, drive about four miles and turn left on Russell Road, at a sign for Twin Springs and Dry Creek.

Drive south for about 15 miles. At a prominent, but unsigned, junction, turn right and continue south toward the power transmission line. Twin Springs campground is about 12.5 miles south of the junction.

From Twin Springs, continue south for four miles to the Dry Springs Road. The last mile or so is rocky and rough as the road descends into a canyon. Just after crossing Dry Creek — a rocky ford; there is no bridge — turn left, at a cattle guard, onto Dry Creek Road. This road has some rough patches that demand four-wheel drive and high ground clearance. If you decide to walk, it's only about one mile to the Dry Creek Arm of Owyhee Reservoir.

privately owned structures are on public land managed by the Bureau of Reclamation, the federal agency that built Owyhee Dam in the late 1920s and early 1930s.

It's a stark landscape, the contrast dramatic between the reservoir and the desiccated lands that surround it.

But it's also a compelling place, beautiful in spite of its emptiness, its very remoteness an attraction.
