

Sibling wrestles with lingering effects of abuse

DEAR ABBY: I had a horrible childhood with a mean mother who berated and took her issues out on me. I also had an older brother who enjoyed making fun of me and embarrassed me in front of others to get his kicks. He still never misses an opportunity to pull a "gotcha."

I was raised at a time when child abuse was considered making a kid tough. What it did to me was break me down emotionally. Does PTSD ever go away, or do I have to live with it to the end?

— JUST GETTING BY IN NEW YORK

DEAR ABBY

go away on its own, and you do not have to "live with it." Distance yourself as much as possible from your bully brother. You can find the help you need by asking your physician or insurance company to refer you to a licensed psychotherapist who specializes in patients with PTSD. You won't be the first person to do "couch time" after an abusive childhood. Trust me on that.

DEAR ABBY: My father-in-law has spent every Friday night with my husband and me for two years, ever since my mother-in-law passed

away. My husband spends every Tuesday evening with him at his house. My sister-in-law is building a room onto her house for him to live in (he is selling his house). My husband and sister-in-law call him two or three times a day.

Abby, my father-in-law is healthy and still drives. He never pays for any food — my husband and sister-in-law buy all his food. He's a wealthy man, but stingy. I think my husband and his sister are obsessed. What do you think? I'm so tired of this. I don't want him staying at my house. I need privacy! Help!

— OVER IT NOW IN TENNESSEE

DEAR OVER IT: Your husband

and his sister appear to be devoted to their father. Either that, or they may anticipate a big payday once their wealthy parent expires. More than privacy, you may need a break. Arrange to spend some of those Friday nights with women friends, and perhaps his presence will be less onerous.

DEAR ABBY: We welcomed new neighbors and allowed them to use our garbage can until they got one, and gave them a bottle of wine and a housewarming card. We also offered to let them use our downstairs bathroom until the contractor finished theirs. No one else on the block did anything for them. Nothing. They then invited a neighbor and his wife over for drinks and

didn't invite us. My husband says I shouldn't be offended by this. I certainly would have had the neighbors who had welcomed me over first. What do you think?

— SNUBBED IN THE SOUTH

DEAR SNUBBED: I think you and your husband are more than neighborly. I also think you are blessed with common sense, something your new neighbors may lack. My advice is to let this unfortunate incident slide without holding a grudge. Take the high road and move on. Nothing positive will come of allowing this to fester. Whether the couple is worth knowing better will become apparent with time.

BOUNDARY

Continued from Page 1B

A notable example is the border between Baker and Grant counties. For more than 30 miles the western boundary of Baker County, and the eastern border of Grant, is defined by the hydrologic divide between the Powder River and the North Fork of the John Day River.

This past Sunday, May 16, I went for a hike with my wife, Lisa, and our son, Max, during which we crossed that divide — and the county line — in the mountains several miles northwest of Sumpter.

Our route was on a forest road with moderate grades and occasional views of the multiple mountain ranges.

It was a fine morning for a hike, the penultimate day of the summery stretch that has since been rudely interrupted by weather more typical of March than May.

Forest Road 900 branches off the Elkhorn Drive Scenic Byway northwest of Sumpter (see "If You Go ..." box on Page 1B).

From the Byway it's about 2.2 miles, with an elevation gain of 700 feet, to the divide that marks the county boundary. We drove up Road 900 for a little more than a mile, starting our hike near where the road runs beneath the Oregon Trail Electric Cooperative power line that goes to Granite.

The road runs through a classic Blue Mountains mixed-conifer forest. On the warmer, drier south-facing slopes big ponderosa pines share space with grand firs and Douglas-firs, while on

The Greenhorn Mountains seen from Forest Road 900, near the Baker-Grant county border.

Lisa Britton/Baker City Herald

the shadier north and east slopes, where snowdrifts defied the balmy air, the stand is a denser, more diverse combination of tamarack, lodgepole and grand fir.

The road switchbacks a couple times before reaching the 5,800-foot crest of the ridge in a wide saddle. This is the sort of remote mountain intersection that always intrigues me because it is such a natural rendezvous spot. I wonder how many gatherings have happened here, how many times hunters have paused on a snowy November day to talk about elk, or firefighters have stopped to spread a map across a pickup truck's warm hood while searching for a reported plume of smoke.

Another road — the 850 — joins Road 900 here. Road 850 descends for a mile or so to Bull Run Creek and Gold Center, where a pipe spills frigid spring water at a turnout on the Elkhorn Byway.

As we didn't want to regain several hundred feet of elevation, we opted to stay on Road 900, which is mostly flat as it contours along a slope.

I'm glad we did, not so much for the easier hiking but because of the views from the relatively lofty vantage point. First to appear between gaps in the forest — mostly young lodgepoles that recolonized this area following bark beetle outbreaks and fires decades ago — was shield-shaped Desolation Butte, its fire lookout tower barely discernible.

As the road continued south we had a fine view of Mount Ireland, another summit capped by a fire lookout that's staffed each summer. Ireland's lookout, though several miles closer, isn't visible from this point, though — unlike the thickly forested (if curiously named) Desolation, Mount Ireland's summit is mostly bare rock, so there

was no need to perch its lookout atop a tower to afford the firewatcher an expansive view.

At each bend in the road another range came into

sight — the Greenhorns, with the naked pinnacle of serpentine, the actual green horn, standing conspicuous below Vinegar Hill, the range's apex; then Strawberry Mountain,

tallest peak between the Elkhorns and Steens Mountain; and finally a brief glimpse, through a gap in the intervening ridges, of Dixie Butte.

I briefly considered making a loop hike — I generally abhor backtracking — but after a quick look at the map I decided against that option. To get back to the 900 Road junction we'd have had to walk nearly three miles on the shoulder of the Elkhorn Byway. Returning the way we'd come was both shorter and, perhaps more attractive on a day that had warmed into the 70s, much shadier.

The grandest viewpoint turned out to be almost within sight of where we parked. We came round a corner and suddenly the eastern horizon was dominated by the Elkhorns, and in particular Rock Creek Butte, highest in the range at 9,106 feet.
