This week FOB Last week Last year 2,350 7,500 11,180 Compared to Jan. 23: Export and feeder hay both steady to weak in a light test. Trade very slow for both domestic and export markets. Ports continue to have issues getting product shipped out due to a labor dispute. The strength of the dollar is also making for tougher export deals to be made. A milk price in the low teens is weakening the demand for test hay. Retail/Feedstore hay steady. Demand remains good.

starting to grow and end users are being able to turn animals out on pasture rather than purchase and feed additional hay. Fewer containers available at the shipping ports has slowed down the ability to export hay overseas. Several producers have sold all that they plan to sell for this season.

Ports continue to have issues getting product shipped out due to a labor dispute. The strength of the dollar is also making for tougher export deals to be made. A milk price in the low teens is weakening the demand for test hay. According to the U.S. drought monitor, the drought in the West will not see much relief through the first week of February as the area remains likely to have below-normal precipitation. Cattle prices in dollars per hundredweight (cwt.) except some replacement animals per pair or

(Federal-State Market News) St. Joseph, Mo.

Last year This week Last week 245,000 407,300 352,300 Compared to Jan. 23: The downtrend again continued this week with Jan. 23 sales and early week sales catching the full brunt of price declines as Cattle futures Jan. 23 were limit lower and sharply lower on Jan. 26 to start the week. Early week sales were \$10-20 lower with several sales \$25-30 lower. The Board showed some footing on Tuesday with sharp gains and some light follow through buying on Wednesday made cattle feeders feel a little better for a change as prices from mid-week on were mostly uneven, trading \$5-10 lower in most cases. The most decline this week was on calves weigh

ing 450-650 lbs. with the 5 weight steers feeling the full decline. Cattle buyers showed some caution this week on calves that will go to grass as they try to fill their needs early enough to get their stockers assembled and straightened out before offerings tail off. Bearish signals continue to lead the way in the

cattle markets as pressure comes from several factors: the CME Board remains very volatile searching for direction after the enormous sell-off in Decembe and January; declining boxed-beef prices; a steadily rising U.S. dollar that is at a near 11-year high. All when added together can become trouble Two weeks ago, boxed-beef prices hit an all-time

high at \$263.81 on Choice product and it seems this was all but ignored. Since then Choice product has fallen over \$21, closing on Jan. 30 at \$242.44.

The bearishness of the feeder and fed cattle mar kets have also spilled over into the slaughter cow market. This market is seeing steep declines of \$10-20 lower over the last several weeks. This past fall saw droves of feeding cows being bought with competition from ranchers/feeders looking to either harvest another calf from the old girl or put some cheap weight on her. Much cheaper feed and a good outlook made the cow feeding outlook attractive. Three months later and markets are lower with

supplies of these cows coming back to the auctions especially in the Northern plains with packers bidding substantially lower. The feeder cattle prices seen over the last couple of weeks may be more realistic than the record prices we saw last year.

The U.S. Cattle Inventory report was released Jan. 30 with all cattle and calves in the U.S. as of Jan. 1 totaling 89.8 million, 1 percent higher than heifers that have calved were at 39 million head, up 2 percent from 38.3 million head a year ago, while beef replacement heifers were at 5.8 million head up 4 percent. The week's auction volume consisted of 61 percent over 600 lbs. and 37 percent heifers.
