2,407 1,577 Compared to Feb 20: Prices trended generally steady compared to the same quality last week. Trade activity and demand have picked up a little this week. The good weather in several areas of Oregon has slowed down demand, as the pasture grasses are growing, causing end users to be able to turn animals out on pasture rather than purchase and feed additional hay. Fewer containers available at the shipping ports has slowed down the ability to export hay overseas. Several producers have old all that they plan to sell for this season.
