Compared to Feb 27: Prices trended generally steady compared to the same quality last week. Trade activity and demand have slowed a little this week. The continued good weather in several areas of Oregon has slowed down demand, as pasture grasses are

2,407

growing, causing end users to be able to turn animals out on pasture rather than purchase and feed additional hay. Few containers available at the shipping ports has slowed down the ability to export hay overseas. Several producers have sold all that they plan to sell
