# WHAT WORKS TOGETHER, WEARS TOGETHER.

## TWO SUPERIOR PARTS. ONE UNBEATABLE SYSTEM.

There's a reason why New Holland cutting parts continue to set the industry standard. Our guards and sections are designed to be superior on their own, but when used together, you've got a cutting system that performs better and lasts longer than anything else.

**NEW HOLLAND GUARDS:**

**BACK BAR**  
Specially heat-treated to 53-63 Rockwell hardness to reduce premature wear between the guard and the section.

**NEW HOLLAND EXCLUSIVE! TRASH BAR**  
Undergoes an additional induction-hardened process to help withstand wear from friction of crop, sand and debris.

**LEDGER AREA**  
Additional induction hardening provides longer wear-sharp surface for increased cutting efficiency.

**MATERIAL**  
Modified, high-carbon steel is through hardened before induction hardening, which offers superior strength compared to surface treatments.

**NEW HOLLAND SECTIONS:**

**BACK HARDENED**  
Back edge is hardened to 49-54 Rockwell hardness to increase wear life and eliminate the need for frequent adjustments.

**SERRATIONS**  
Top-serrated design of crop preparation sections directs flow of material across serrations, sharpening the teeth as you cut. On grain head sections, a special design root serration prevents excessive wear across the top.

**ZINC COATING**  
Has the same strength and appearance as chrome, but offers superior rust protection and, most importantly, uses a hex-free process that doesn't involve pollutants.

**MATERIAL**  
Made from shot-blasted 1080 high-carbon steel to deliver superior strength and wear life.
