mand lays with the retail/stable hay. According to some producers, horse owners are starting to prefer lower sugar, higher protein hay. Many hay producers are looking forward to upcoming snow in the forecast as hay sales tend to increase as the snow comes. Recent dry weather in some areas throughout the state has increased

movement.

All classes traded steady with moderate demand. According to the U.S. Drought Monitor, 2 or more inches of precipitation fell from the Northern California coast to the Cascades of Washington, and along upslope areas of the Sierra Nevada in California. Nov. 28 SNOTEL data reflected a good start to the snow season for Northern California mountain snowpack, with some basins 130-140 percent of median. But this is early in the snow season, so median values are easy to exceed. And basins to the south, including the San Joaquin are still lagging, below 70 percent of median in more southerly locations. In California, 65 percent of the topsoil was rated short to very short, an increase of 5 percent from last week, and 65 percent of the subsoil was short to very short, according to the USDA Tons

Idaho; 800-900 lbs. \$118-125 Idaho. NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph. Mo.

Last week

146,100

Compared to last week: Steers and heifers

Last year

266,900

traded \$2 to \$6 higher with most steer calves under 600 lbs. up to \$10 higher. Several mid and late week auctions were called sharply higher and while they were in fact much higher, many were looking back two weeks due to the Thanksgiving holiday. Those sale barns had some catching up to do with last week's early

auctions, many of which had held specials before

cattle suitable for wheat. Winter weather curtailed

AG EXPO

Demand was very good for all classes of cattle this week, but still exceptionally good for light receipts in parts of the Dakotas but elsewhere across the country the supply was heavy. The volume that was lagging in the early fall is being

caught up now. The cash feeder market has re-energized, with several weeks of steady gains being convincing enough for owners to finally bring their stock to

In some parts of the country, the supply was so heavy that by mid-week competition for available trucks was just as intense as the rivalry ringside. Weaned calves continue to make up a larger percentage of the offering each week and in most places, the competition to own anything that could be placed in an extended winter grazing program

Buyers seem to have a renewed confidence in the market, evident by their willingness to chase some cattle to prices that haven't been seen in

Colder weather moved into the Midwest midveek which will help harden and "green up" fleshier cattle. Fed cattle traded as much as \$3 higher Nov. 30, \$114-115.50 live and northern dressed

Futures prices are now lagging cash by quite a few dollars, as the market moves in a more fundamental direction with cash cattle leading the board and not the other way around.

Cash trade has tacked on \$10 in just three weeks and fats are as close to break-evens as they've been in quite some time. Big kills over an extended period have cleaned up the front end, giving cattle feeders a little leverage they'd

Packers will push to keep kills large and are clearly willing to pay up a bit, giving up a bit of margin even, as they have fewer formula cattle available in the short term

Optimism is bountiful as the entire cattle complex has recovered remarkably from early November lows. Cattlemen are fully aware of the fickle nature of their market and while there's no assurance this six-week rally will hold it has brought a little relief to an industry that badly needed it.

AUCTIONS This week Last week Last year 275.900 95,900 227,900 WASHINGTON 2,600. 64 pct over 600 lbs. 42 pct heifers. SAGE Fact #136

The Covote Springs cogeneration plant, operated by Portland General Electric, burns natural gas to generate both electricity and steam. Food processors and other businesses in the Port of Morrow purchase steam for use in their facilities reducing electricity and natural gas costs.

Visit the SAGE Center Monday through Saturday from 10 a.m. to 5 p.m. Find us on:
