According to the DMN National Retail Report-Dairy for the week of April 7-13, the national weighted average advertised price for one gallon of milk is \$2.45, down 23 cents from last week, but 3 cents higher from a year ago. The weighted average regional price in the Southwest is \$2.72, with a price range of \$1.99-3.99. The weighted average regional price in the Northwest is \$2.59, with a price range of \$1.79-3.69.

contacts suggest the spring flush has entered into the region earlier than usual. Milk output continues to improve in areas of Idaho and Utah that were impacted by flooding earlier in the year.

However, a few contacts feel the poor cow comfort from the last few months may have suppressed lactation volumes into the future. Processors say there is plenty of milk for most processing needs. Condensed skim output continues to be lower and sales are also dropping. Cream is abundant in the West, but sales are down. Manufacturers are running at full capacity, making butter. Cream is in excess of churning
