

RANCONA® SUMMIT. ADVANCED SEED TREATMENT TECHNOLOGY FOR SOYBEANS, CEREALS AND PULSE CROPS.

With RANCONA® SUMMIT, one seed treatment is all you need to protect soybeans, cereals and pulse crops. By combining two powerful fungicides that control both seed- and soil-borne diseases, including seed borne *Ascochyta*, with the superior coverage and adhesion of RANCONA microdispersion (MD) technology, you have a ready-to-use seed treatment that provides more vigorous and uniform crop emergence for healthy stands and greater yield potential. Because when more seed treatment stays on the seed, you get more out of your seed treatment. To learn more, visit ranconasummit.com.
