FLUID MILK AND CREAM REVIEW - WEST (USDA Market News) April 12

California milk production has started its downfall in that many manufacturers have reached their peak production levels in the past weeks. Nonetheless, milk supplies are still more than enough to meet all processing requirements.

In the quest for additional processing capacities, some milk continues to move out-of-state. Milk intakes from bottlers have not changed much from the previous week. Arizona milk output is in line with normal se

sonal output levels for this time of the year. With the state being in the peak of the spring flush, milk loads available for processing are abundant. Manufacturers are working at full schedules and managing well the milk supplies. Some loads of milk continue to move to other regions for processing. Milk intakes from the retail sector, as well as restaurants, are steady. In Arizona, alfalfa conditions are 81 percent good to excellent this week compared to 79 percent last week.

New Mexico milk market undertone seems steady. Although production is slightly down, loads of milk are readily available to fulfill all processing obligations. Most plants are working at or near to full capacities. Class I sales are steady to slightly lower, but Class II demand is slightly up. Milk going into cheese production is up. Alfalfa hay conditions are currently 39 percent good to excellent compared to 38 percent last we

New Mexico is defined as 99 percent abnor mally dry or worse.

Pacific Northwest milk volumes are hitting expected levels. Milk production is following seasonal patterns with a steady climb into spring flush

However, cool weather has dampened heavy milk usage for ice cream manufacturing and de

Organic: Top Cow, \$91.00; Top 10 Organic, \$79.59; Avg. All Organic, \$68.15. Bulls: Conventional: Top Bull, \$97.00; Avg. All Bulls, \$88.91. layed the grilling season. Some milk is pushing into the region from surrounding states. Dairy manufacturers report plenty of milk for most dairy processing.

In the mountain states of Idaho, Utah and In the mountain states of Idaho, Utah and Colorado, industry contacts say milk production is coming on strong. In the southern reaches of the region, the flush is at hand. And in the north, some contacts feel there may be an early flush in areas that normally do not see peak production until early July. Although milk is in oversupply, and some milk is spilling over into surrounding regions, milk handlers say the loads are finding homes with manufacturers. Area dairy contacts say water reservoirs have

been adequately recharged and, barring any unforeseen weather events, they expect forage and hay costs will stay relatively low.

Western condensed skim processing is active as milk loads that need to be cleared remain plentiful. Cream supplies in the West are adequate to meet all manufacturing obligations

Moines-St. Joseph, Mo.-Moses Lake, Wash.

NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph. Mo. April 13 Last week This week

2017 277,300 196,700 348,300 Compared to April 6: Feeder steers and heifers sold mostly steady to 5.00 higher. Some auctions that were called sharply lower last week recovered and were called sharply higher this week due to stability in the market place.

The CME Cattle complex has been a driving force in the roller coaster ride of the last couple of weeks. Whenever a news item comes out that the market takes as a bullish factor; another tidbit of news comes about and a bearish tone overtakes the positive news.

Since last Friday's close, the Live Cattle contracts were mostly 1.78 to 2.30 higher, with nearby April being 4.85 higher as convergence with the negoti-ated trade in the feedlots is coming closer to fruition On Wednesday, fed cattle traded in the Southern

Plains steady to 1.00 lower at 117.00 to 118.00. This afternoon in Nebraska, some early live sales there traded at 122.00. Analysts have been watching very closely the amount of cattle being purchased by packers the past few weeks. Many producers are very diligent and staving current with their marketings as cattle in the Southern Plains have been gaining very well this winter.

The season has been very easy on the Kansas and TX/OK/NM feedlots, however in the Northern Plains, wet pens increase the cost of gains and decrease the yield on cattle that have had to slog through mud to get to the feedbunks.

The excessive winter moisture has brought about the question of how long will it take all the calf-feds to get through the pipeline this year.

Producers have been eager to fill empty pens this week. Late last Friday at Fort Pierre Livestock in For Pierre, S.D., five loads of steers weighing 809 lbs sold at 147.25.

On Wednesday at Hub City Livestock in Aber deen, S.D., a load of steers weighing 794 lbs sold at 151.25.

Also on Wednesday at Bassett Livestock Auction in Bassett, NE a load of steers weighing 754 lbs sold at 157.00.

On Thursday at Mitchell Livestock Auction in Mitchell, S.D., three loads of 901 lbs steers sold at 135.10.

On Thursday at Ogallala Livestock Auction in Ogallala, Neb., a load of 611 lb steers sold at 196.50

while two loads of 669 lb steers sold at 185.25. A part load of replacement heifers in Bassett Neb., weighing 778 lbs sold at 157.00. Only the steer mates to these heifers within that same 50 lb weight group could even match the price received for the females.

Packers have been accepting a generous margin for this time of year and the extra incentive to har vest 600K-plus per week has bolstered bottom lines for the companies.

Boxed beef has lost around 13.00 since the most recent high 3-4 weeks ago and in the face of ad-versity since the Easter holiday. Grills need to be fired up in the Midwest and the Northeast to get the cutout to move up. With Mother's Day, Memorial Day, Father's Day

and Independence Day on the horizon, retailers are

Winter Storm Xanto this weekend is expected to bring heavy snow and blizzard conditions from the Northern Plains to the Great Lakes and farmers are wondering if spring will ever get here this year. Named winter storms have now included an "X" name and many across the Northern Plains

getting ready to start their spring and early summer

and New England are not wanting to have a Winter Storm Yvonne; they are tired of being cold and wet. Preliminary first quarter slaughter data has indicated heifer slaughter to be over 4 percent above a

year ago and over 10 percent higher than the previous 3-year average. Beef cow slaughter is over 10 percent higher than

2017 and around 19 percent above the previous 3-year average. With all the drought locations in the United States currently, one could question just how much producers can hold on to the breeding herd with forage prices increasing exponentially this win-ter and spring. Auction volume this week included 58 percent weighing over 600 lbs and 44 percent

#### NATIONAL SLAUGHTER CATTLE SUMMARY April 13

Slaughter cattle traded mostly 4.00-6.00 higher for live in Kansas and Nebraska and 2.00-6.00 higher on dressed sales. Few live trades in Texas vere mostly steady. Boxed Beef prices as of Friday at afternoon averaged 206.26 down 3.70 from last Friday. The Choice/Select spread is 12.70.

Slaughter cattle on a national basis for negotiated cash trades through Friday afternoon totaled 55.023 head. Last week's total head count was 77,582. Midwest Direct Markets:

Live Basis: Steers and Heifers: 120.00-122.00. Dressed Basis: Steers and Heifers: 190.00.

South Plains Direct Markets: Live Basis: Steers and Heifers 117.00-118.00.

Slaughter Cows and Bulls (Average Yielding Prices):

Slaughter cows and bulls sold steady to 2.00 higher, with exception of Colorado trading 1.00-2.00 lower. Packer demand moderate to good. Cutter Cow Carcass Cut-Out Value on Friday

173.98. NORTHWEST WEIGHTED DIRECT FEEDER CATTLE April 13 Last week 2017

This week 1,352 748 5,500 Compared to April 6: Feeder steers and heifers had no FOB current trades to compare. The feeder supply included 100 percent over 600 lbs and 23 percent heifers. Unless otherwise stated prices are FOB weighting points with 2-3 percent shrink

or equivalent and a 5-10 cent slide on calves and a 4-12 cent slide on yearlings from base weights. Current sales are up to 14 days delivery. Feeder Steers Medium and Large 1: 380 Head: 685 lbs; Avg Price 158.00; Current Del
