Hay Market Reports

Compiled by USDA Market News Service • St. Joseph, Mo.-Portland

Hay prices are dollars per ton or dollars per bale when sold to retail outlets. Basis is current delivery FOB barn or stack, or delivered customer as indicated. Grade guidelines used in this report have the following relationship to Relative Feed Value (RFV), Acid Detergent Fiber (ADF), TDN (Total Digestible Nutrients), or Crude Protein (CP) test numbers:

GRADE	RFV	ADF	TDN	CP
Supreme	185+	under 27	55.9+	22+
Premium	170-185	27-29	54.5-55.9	20-22
Good	150-170	29-32	52.5-54.5	18-20
Fair	130-150	32-35	50.5-52.5	16-18
Utility	under 130	36+	under 50.5	under 16

Washington-Oregon (Columbia Basin)			
Weekly Hay Report			
Sept. 6			
This Week	Last Week	Last Week	
5100	5200	11,250	

Compared to Aug. 30: All grades of Alfalfa domestic and export steady. Timothy not tested this week. Trade slow to moderate this week as export and domestic buyers remain cautious. Demand remains moderate to good on Alfalfa, very light on Timothy as producers are having a hard time getting any firm offers. Many producers are cutting 4th. Feed store/retail hay steady. All prices are dollars per ton and FOB the farm or ranch unless otherwise stated.

	Fair/Exp	400	90.00

Compared to Aug. 30: Prices trended generally steady compared to last report's prices. Retail/Stable type hay remains the most demanded hay. Some hay acreage has been changed over to grow hemp this year. The holiday this week has contributed to lower sale volume. All sales in this report are 2019 crop year hay.

Compared to Aug. 30: All grades of Alfalfa steady to weak. Producers are busy harvesting this week. Demand remains good especially for high testing Alfalfa. Retail/Feed store not tested this week. Prices are dollars per ton and FOB the farm or ranch unless otherwise stated.			

Compared to Aug. 30: Trade activity light to moderate on moderate demand. According to the NASS Crop Progress Report Sept. 3, in Tulare, Fresno, and Kings Counties, alfalfa continued to be irrigated, cut and baled. Cotton was in full bloom. Corn was being cut for silage. Harvesting of safflower continued. Garbanzo beans were harvested. Blackeye peas continued to set and fill pods. Sorghum was growing well. In Sacramento County, sunflower was drying down and harvesting began. Hay is reported FOB the stack or barn unless otherwise noted. Regions are defined at bottom of report.

Dairy Report

Compiled by USDA Market News Service • Madison, Wis.

Fluid Milk and Cream — Western U.S. Sept. 5

The California milk market is following seasonal norms when it comes to the Labor Day manufacturing activities. Demand for Class I was a bit down. Balancing schedules were more active at the beginning of the week, but are back to normal now. Milk supplies are plentiful to meet all requests. Production is steady compared to last week.

Arizona milk volumes produced are unchanged from a week ago. There was no need to bring in out-of-state milk as offers within the state were enough to satisfy all

buying obligations. Fluid milk sales are stable to down.

Milk production is adequate to fill the needs of all New Mexico manufacturing facilities. Class II and III demands are up, whereas Class I sales are down. Milk balancing volumes are declining bit by bit after the holiday. Processing machines are running near full capacity. There were a few repair and maintenance workloads that had minor impacts on dairy plants' operations.

While overall milk production in the Pacific Northwest is steady to lower, warm days and cool nights have provided good cow

comfort, keeping milk output levels strong. Manufacturers report having plenty of milk for processing needs. Bottlers are getting the school pipelines refilled, and the skimming is freeing up a bit more cream for Class II and butter production.

Idaho, Utah and Colorado milk production remains strong. Milk output is in generally good balance with processing needs, however a few loads of discounted milk are available at \$4.75 under Class IV. Dairy manufacturing facilities are running at or near capacity. Condensed skim processing is mostly steady in the West. Supplies are

readily available. There is a slight uptick in butter during this week as cream is more present in the market.

Ice cream makers are requesting less cream.
