

SAFE FISH. HEALTHY RIVER. CLEAN POWER.

Grant PUD works hard to ensure salmon make it past our Priest Rapids and Wanapum dams and find the habitat they need on our part of their journey to the ocean and back again to spawn.

We spend millions annually on research, safe passage, hatcheries, and predator control to boost fish populations and improve river habitat. Through these efforts, Grant PUD's operations achieve "no-net-impact" on fish.

And you can help, too. Learn more at grantpud.org/environment.

WHAT GRANT PUD DOES TO HELP SALMON:

- Hatcheries**
- Fish Bypass**
- Fish Ladders**
- Predator Control**
- Dam Operations**
- Habitat Preservation**
- Research**

WHAT YOU CAN DO TO HELP SALMON:

- Respect catch limits**
- Keep Streams and Shorelines Pollution Free**
- Stop Invasive Species**
- Preserve Good Habitat**
- Support Sustainable Seafood**
